Many slab abseils. We got in at the new bridge just before Serenéll (in the side stream). The reason for this was work on the hiking trail where they were causing stones to fall into the canyon. (machine translated)

Mostly very easy to walk, but also slippery in some places. Crystal clear water rather cold but great in summer. Dead animal with strong odor but outside the watercourse. A jammed stone forms a syphon approx. in the middle of the tour, be careful when the water level is high. Access: After the turnoff to the inferiore, a steep meadow leads up to a good path. Entry: We descended a dry side arm a few meters above the marked entry and rappelled from a tree into the streambed. (machine translated)
