Specialities:

Gear:

Summary: (machine translated)
Impressive vertical with water only after rainfall. Reinstallation material required. Only for people experienced in big verticals.

Hydrology: (machine translated)
Not in the vertical, impossible

Access: (machine translated)
Same access as to the Aigüeta de Barbaruens.
On the N-260 from Graus to Benasque, we pass Campo and arrive at Seira. We take the road to Barbaruens and before arriving there is a track on the left that goes up these slopes for just over two kilometers to a junction of tracks.
With only one car we will continue straight ahead towards the Bilsé river and before crossing it we will park in front of the walls to descend.
With two cars we will take the track on the left that goes up to a parking lot to take the path of Ibón de Armiñe.

Approach: (machine translated)
From the car below there is a marked PR path that goes up the slope towards the Ibón.
From the car above we will have to continue along the track towards the Ibón and the refuge.
In both cases we will continue along the track until almost 1650m high, when we will be in the Gargalluso cirque, when we see the riverbed we will get into it.

Tour: (machine translated)
A few skills to access the great vertical fractional Gargalluso waterfall. A first rappel from a tree to reach the intermediate area where we will find a handrail and some spits to make the rest of the descent.

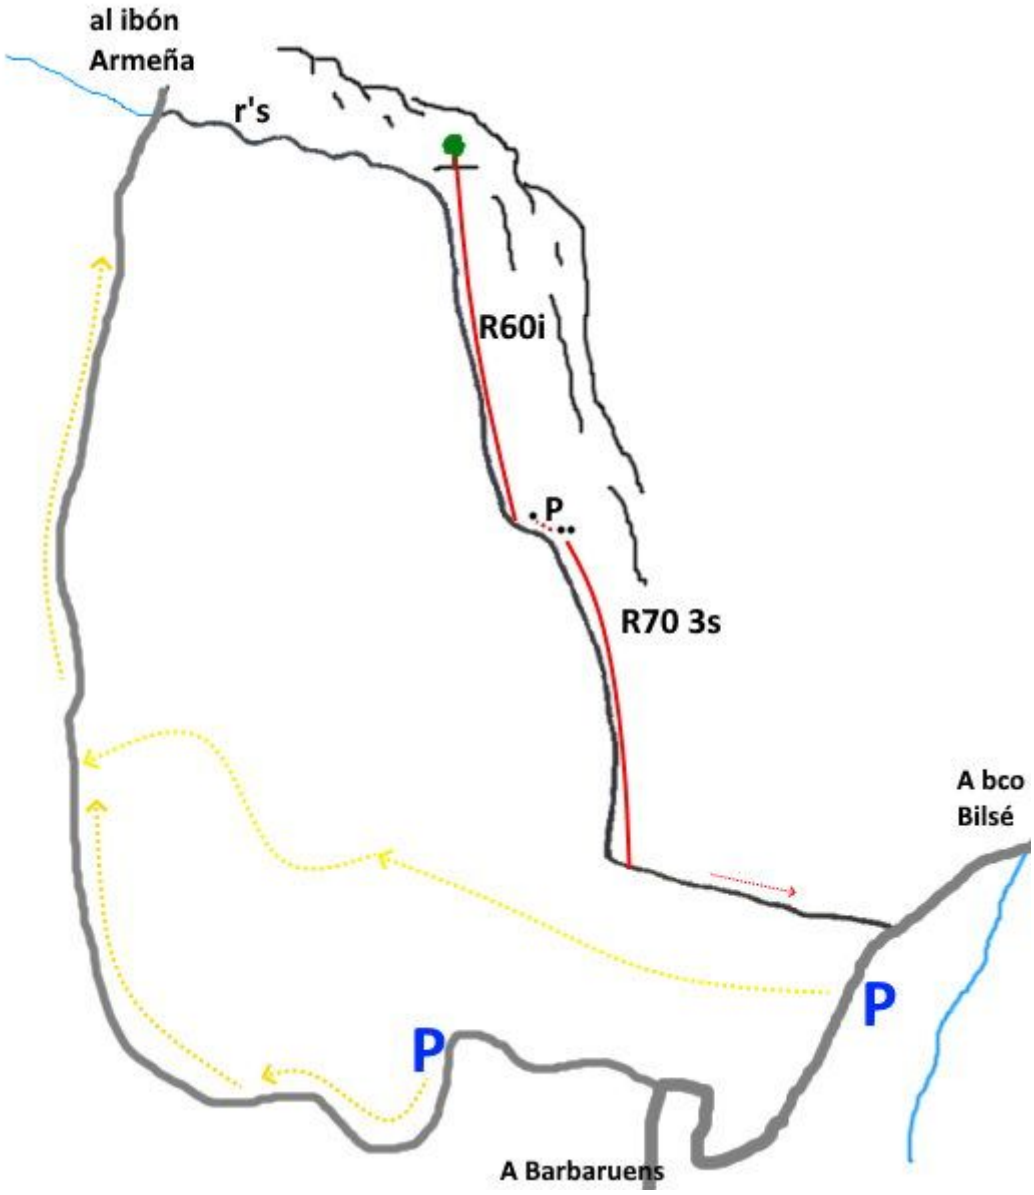

Return: (machine translated)
We follow the riverbed to the track and next to it we have the car.
