Specialities:

Gear:

Summary: (machine translated)
With permanent flow, it is a canyon that can be used for initiation (out of season of strong flow). Fun, in an environment of lush forests, ferns and plenty of water. Highly recommended because its access is short and immediate return. Its lower part is full of pools and slides.

Hydrology:

Access: (machine translated)
We must go to Elgoibar. Once in the town by the N634, in front of the Hyundai we take Eulogio Estarta street until the end.

Approach: (machine translated)
The street becomes a track that we will take and leads us to the river. This same track turns right and goes up the river until it reaches a point that crosses it.

Tour: (machine translated)
Simple descent that begins with a beautiful waterfall, continues with an area of pools and slides, to reach two rappels of 6 and 10 meters and close the canyon a little. We have another area of pools and slides and we reach the final rappel.
Most of the people who descend this ravine, do it until the water collection hut, located on the left margin, leaving by the disused track that leads us back to the initial parking (2024.07-Alex U.).
In case of continuing the descent and descending the last cascade of 35m, it is indispensable to have previously parked another vehicle in the highway N-634, next to the house, since the return way that leaves from this point, is completely eaten by the vegetation it is practically impossible to return by that way and later track.(2024.07-Alex U.)

Return: (machine translated)
We turn left in search of the access road.
