Canyon length: 500m	Highest rapell: 23m	Amount rapells: 18
Transport:	Rock type:	Drainage area: km ²
Season: June - November	Orientation:	Best Time:
Rating: ★ 0 ()	Info: ★ 0 ()	Belay: ★ 0 ()
Specialities:		
Gear:		
Summary: (machine translated) This canyon is generally dry except after rains. Very well excavated, it is a perfect crevasse with thousands of rappelling or climbing skills in opposition. Prohibited between December and June due to nesting.		
Hydrology: Imposibles		
Access: (machine translated) Access to Foratata, Chines, Isarre Sup and Buitrera banks. We must be located in Santa Eulalia la Mayor. For it by the N240 direction Lleida we will go to Loporzano. From here to Sasa de Abadiado by the HU330 and here we continue to Castilsabás where we turn left to Santa Eulalia. We will continue along the track that comes out after crossing the village, next to the church. After a few kilometers we arrive at a crossroads in the form of "Y", on the right we will go down towards the parking of the return car (Ermita de San Chinés). On this track towards the hermitage we will go until we find a chain, if it is not closed we will go to the same access of the hermitage. With the access car we will go left towards Puntas de Baíl until we find a sharp right curve where we will find a chain. We also have the option of leaving a car in Vadiello in the parking lot of the VF del Palomo.		
Approach: Acceso bcos Foratata, Chines, Isarre Sup y Buitrera Opción 2: Seguiremos dirección Bail por la senda y nos encontraremos una curva a izquierdas donde hay un panel a La Matosa donde nos meteremos por ese sendero bien marcado dejamos el puente de roca a un lado (acceso a Foratata) y seguimos de frente a la entrada de Isarre, al poco llegaremos al collado donde tendremos que desviarnos hacia el sur-este (acceso Buitreta) para dirigirnos a Los Pepes, los sobrepasamos y nos encontramos con el acceso a esta grieta. Opción 1: Contarla después de la 2 ya da una idea de cómo es XD . Desde el aparcamiento de acceso a la ermita de San Chines nos dirigiremos a esta y desde aquí por la ladera deberemos subir a los Pepes aprovechando una vía de acceso marcada con mojones. Se comenta en varios foros (nosotros no lo sabemos) que no hay que escalar en ningún momento pero que no es recomendable si el suelo está húmedo pues sí que hay pasos expuestos. Si alguien tiene más info... Muchas gracias		

Tour: (machine translated)

It's a long, hard, sporty, and unrelenting crack. Very well formed and very fun although we hardly find it with water.

Return: (machine translated)

When we reach the end, we will be at the Isarre riverbank, which we can descend or take the San Chinés Hermitage path to go to the track of the return car.

Coordinates:

Canyon Start [42.2510 -0.3000](#)
