Summary: (machine translated)
Narrow and deep dark gorge, about 800 m long.

Hydrology:

Access: (machine translated)
We drive north on the A-138 from Ainsa in the direction of Bielsa. After 10 km (from the center of Ainsa) we cross the Rio Bellós and then pass through the village of Escalona. 350m after the bridge we turn northwest at the traffic circle ("Fanlo" - "Anisclocanyon") onto HU-631. We continue along the river (Rio Bellós), enter the canyon, the road goes partly high along the wall and after 23.3 km (from the traffic circle Escalona) we arrive at the saddle north below the houses of Fanlo.
Here there is also an alternative approach on a better, especially wider road. For this purpose, 1.9 km after the mentioned traffic circle in the north of Escalona, we turn left onto the road to Buerba and Vio. We first drive past the campsite and then 12 km up to Buerba. Past the village, up over the saddle (with a beautiful view into the Anisclo canyon) and beyond in sepentines downhill. 4.4 km after Buerba, at an acute angle, we meet HU-631, on which we turn left (in a northwesterly direction). From here it is 8.5 km to Fanlo.
We park our car at the saddle on the side of the road.

Approach: (machine translated)
We take the dirt road descending north from the road junction down into the streambed of the Rio Jalle. In the open gravel bed downstream to the first constriction.

Tour: (machine translated)
First small steps, then the 12m rappel into the hole. From here walking, slides and successively 5 more small rappel. Then the canyon opens and we stand at the edge of a wide but shallow pool.

Return: (machine translated)
Here we look for the stone markers on the left that mark the trail that still leads up. At a fork, we can keep left and reach the track that we walked in the access.
We can also go straight up (or a little to the right) and reach the tarred road. On this road we turn left to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Gloces Pas énormément d'eau et plutôt chaude. Je l'avais parcouru il y a 15 ans et je ne me souvenais pas qu'il y avait autant de troncs coincés. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2826/observations.html)

Super canyoning. We got in at 11:30 and everything was perfect. All belays are in good condition and 4mm neoprene was ideal. Before and after us some groups and therefore short waiting times but fully OK (machine translated)
