Summary: (machine translated)
Aquatic rappel canyon with fun potential

Hydrology:

Access: (machine translated)
From the Autoroute du Rhône - exit Martigny/Fully - we drive through the center of the city and then to Salvan. From there via Les Marécottes in the direction of Le Tretien. In a bend to the right, the road takes course to the Triège and the bridge.\nIn this bend we find a large area to the left of the road where we park our car for the exit (P2 - see Google aerial photo approach).
With the second car we go back to Marécottes and there we go up on the left towards Cergneux. We come to the second right serpentine and turn left about 50 m later. Still before the bridge over the stream we park the car for the access (P1 - see Google aerial photo implementation route).

Approach: (machine translated)
We take the path that enters the valley of the Triège and then - before reaching the bridge - where the path rises again, we descend the path to the stream where we can rope down(E).

Tour: (machine translated)
11 rappel, some slide and possible jumps, until we end the tour with a jump into the pool in front of the dam (A).
Attention: During our ascent on 15.09.2020 - the local provider no longer goes the canyon! - the exit was much more difficult (eg doors in the tunnel locked), see photo album and video

Return: (machine translated)
At the top of the metal walkway we go right through the tunnel (if door is not blocked!) to Le Tretien and from there on the road to the car.
