Summary: (machine translated) Watery rappel canyon, cold water, slippery		
Hydrology:		
Access: (machine translated) From Breil-sur-Roya on the N204 north towards Tende, Cuneo. Shortly after the village of Fontan (about 8 km until then), we take the D42, which turns left (northwest) towards Berghe. The road crosses the Céva and climbs in switchbacks. After the third switchback, the road passes under a railroad viaduct. At the following rightward haipin bend, park the car on a large flat area right next to the railroad track.		
Approach: (machine translated) We continue uphill along the road until the next but one rightward haipin bend (red map marker "W"). From there, a path leads to the hamlet of Paioret. After the last building, take the path down to the left. Follow the water pipe for a while and then take the tracks down to the stream bed until you reach a bridge.		
Tour: (machine translated) 5-8 rappels. The 45 m fall with an intermediate belay after approx. 18 m, followed by a diverter 6 m before the pool to stay safely out of the water jet. Can be jumped from the diverter.		
Return: (machine translated) At a concrete wall ortographic. Exit to the left and then cross a small tunnel (headlamp useful). Then carefully cross (active) railroad tracks directly to the parking lot.		
Coordinates: Canyon Start 44.0176 7.5460 Canyon End 44.0152 7.5531 Parking Entry and Exit 44.0153 7.5542

Automatisch importiert von Descente-Canyon.com für Canyon Céva Canyon réalisé en ce jour à trois. Déjà très glissant sortie en freestyle sur la gauche de la 45m en mode mike Horn et sortie sous les granges tels des sangliers. A faire une fois pour le cadre magnifique (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2837/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Céva Pour la deuxiéme partie de l'approche, faut suivre le tuyau.Canyon bien équipé, mais équipé au minimum.Le relais sur le 40m n'est pas vraiment obligatoire, mais c'est utile. Pour y arriver il faut descendre sur la premiere verticale et grimper un peu sur le rocher glissant pour continuer jusqu'a un peu plus bas, il n'est pas visible du premier point.Canyon a faire. Automatisch importiert von Descente-Canyon.com für Canyon Céva Parcouru le 31/07/25 (club SCPA Escandaou). Un peu galère de trouver le début du canyon mais on fini par arriver à l'eau. Beau rappel de 45m, glissant par endroit (penser à apporter de la corde à laisser). Equipement correct (plaquettes + goujons) Canyon à faire une fois, pas nécessairement plus.
