Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Lérida / Provincia de Lleida
Town:

Difficulty: not as difficult	**Grading:** v3 a3 III	**Total time:** 2h1
Approachtime: 1h	**Tourtime:** 1h	**Returntime:** 1min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 1100m	**Highest rapell:** 25m	**Amount rapells:** 6
Transport:	**Rock type:**	**Drainage area:** km²
Season: June - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Gorge somewhat fattened, very flowing in spring with the thaw. Few rappels, all of them from natural, so we will have to foresee material.
To be completed

Hydrology:
Posibles

Access: (machine translated)
On the N260 between Pont de Suert and La Pobla de Segur, at the height of Senterada we turn off on the L503 to the Torre de Cabdella. We will continue along the same road to the village of Cabdella, just before the Cabdella's curves, the rivers Riqüerna, Filià and Flamisell meet, on the left there is an esplanade where to park.

Approach: (machine translated)
We will walk up to Cabdella and we will enter looking for the path that goes up to Port de Rus and Taüll, just outside the village we have on the left a path that crosses the Riqüerna and enters the valley of Filià, when we reach almost 1600m high, just over 1km from the exit of Cabdella, the trail approaches the river and we have a path that crosses it.
Another option, if the track that leaves from the parking esplanade is open, is to climb it with the car up to 1600m high, in a closed left fork where you could park.

Tour: (machine translated)
Interesting descent, short route, without big rappels but with great atmosphere. Caution if we dare to do it in spring.

Return: (machine translated)
We will arrive at the bridge where it joins the Riqüerna, we will go out to the right to the parking lot.
