Summary: (machine translated)
Interesting descent in the middle of a forest with a multitude of natural rappels. Much better after rain

Hydrology: (machine translated)
It is an open ravine. In addition to the two trails that intersect there is the possibility of escaping through the forest.

Access: (machine translated)
We must go to Santa María de Aguayo, for it by the A67 take exit 144 (N611 Pesquera) and before arriving to Ventorrillo and Pesquera we take to the right the CA716 to San Miguel de Aguayo. We follow it until Santa María de Aguayo. After crossing the village we turn left onto the CA717 to Santa Olalla and as soon as we cross the bridge we turn left onto a track that goes up to a cattle farm, we go past it to the water tank and park.

Approach: (machine translated)
We cross the metal gate and follow the track that crosses a torrontera (Arroyo de Brañuela), we continue through the forest gradually climbing up to a junction at an altitude of about 950m where we go left and we continue horizontally to the stream. Beware that the path through the forest is easily lost.

Tour: (machine translated)
Natural descent in a forest. After rains and good flow it is an entertaining descent.

Return: (machine translated)
After the last rappel there is a track next to the river Hirvienza that goes up to almost the livestock farm. Here we take the ascending track where we park.

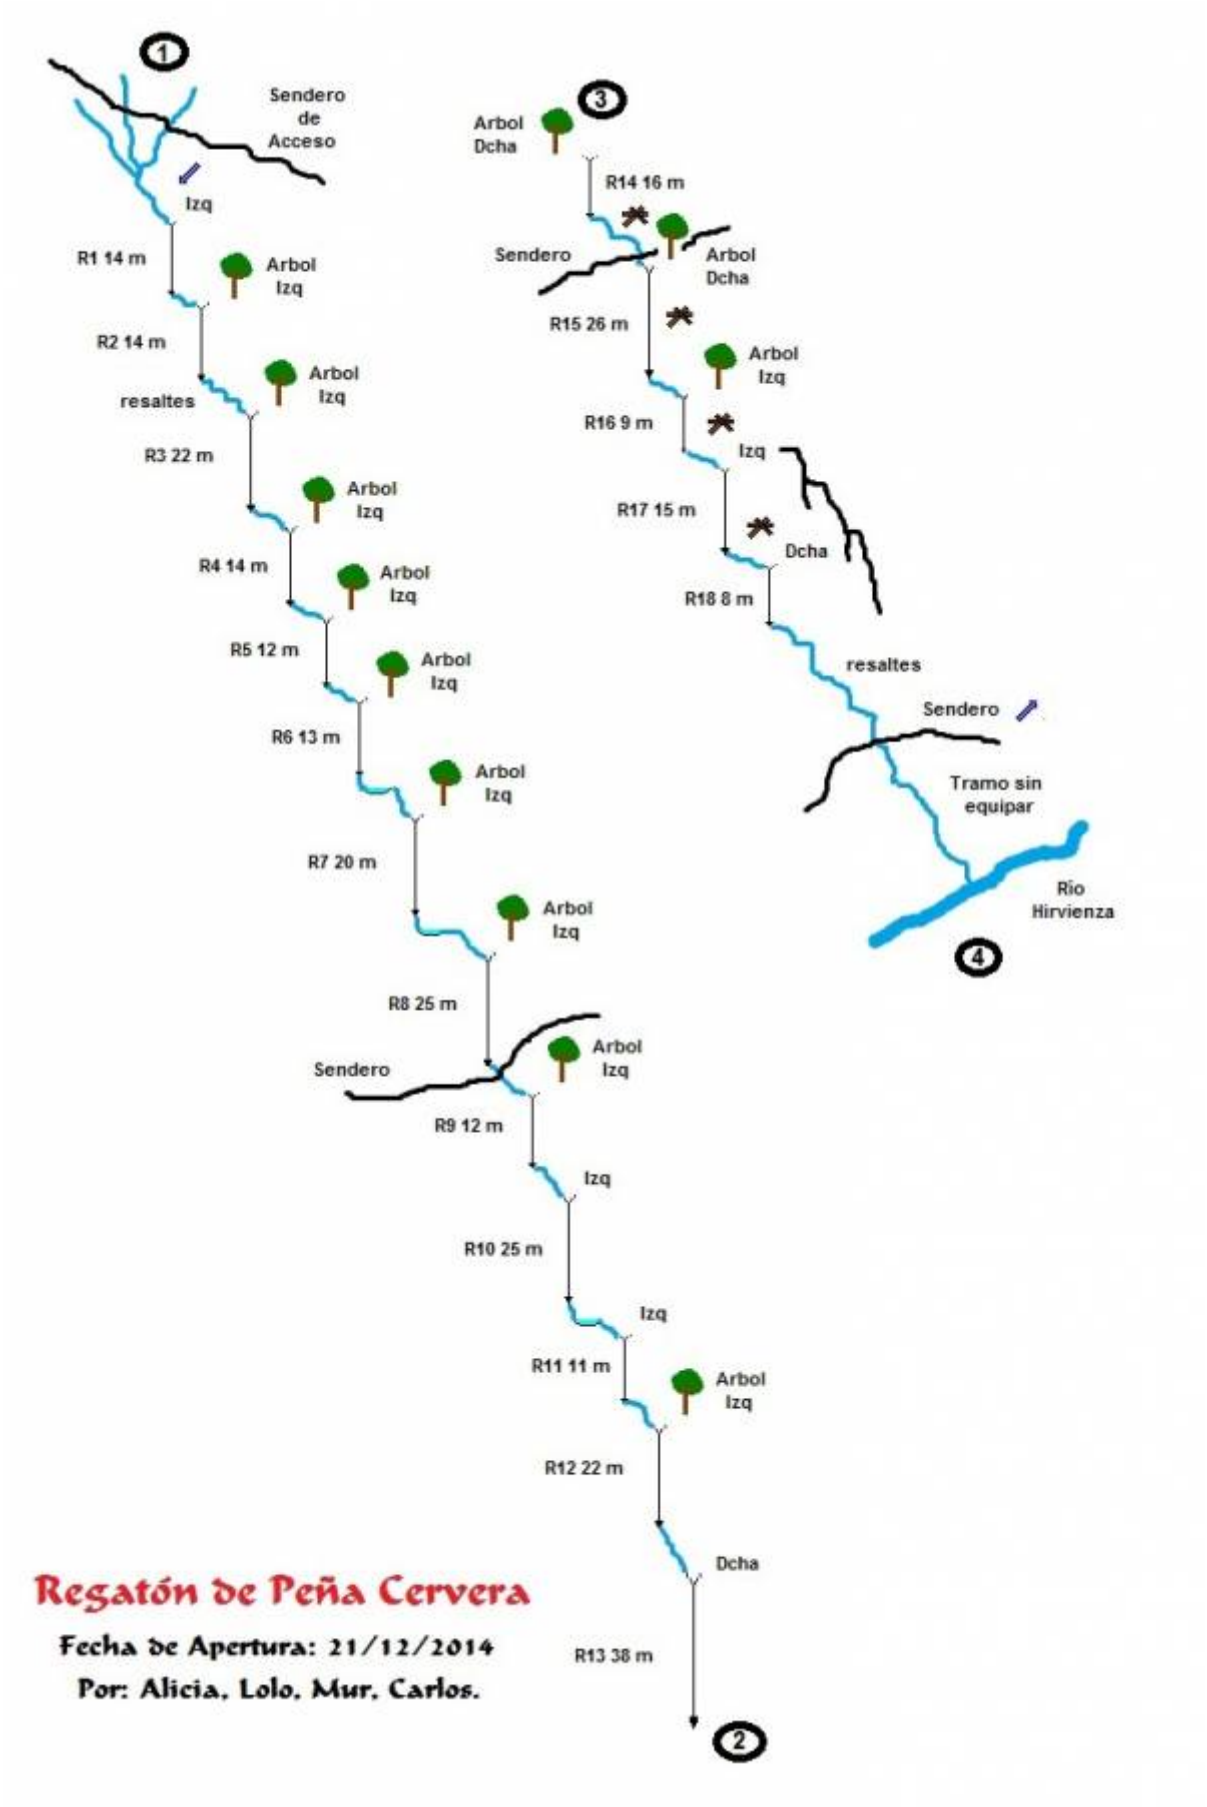

Coordinates:
Canyon Start 43.0564 -4.0242
