Summary: (machine translated)
Watery canyon with many jumps and slides. The Argentina is described here in the usual connection with the Grognardo.

Hydrology:

Access: (machine translated)
Leave the Italian A 10 (Genoa - Nice) at the Arma di Taggia exit (about halfway between Imperia and Ventmiglia). Then take the SP 548 up the valley of the Argentina towards Triora. After 8 km we pass through Badalucco, 12 km after that, just before the village of Molini di Triora, we turn left onto the SP 65 towards Colla Langan. We cross the Argentina and 2 km after the turnoff we reach the first leftward haipin bend, where we park the car.

Approach: (machine translated)
From the bend in the road, take the footpath that climbs slightly northwards over the Argentina to the dilapidated (2009) footbridge over the Grognardo. Enter the Grognardo here (see details there).
Immediately after the end of the dark gorge (i.e. before the orographic exit of the Grognardo), follow the tracks up to the left and take the path to the north, which ascends slightly above the orographic right bank of the Argentina. We come to the medieval stone bridge Ponte di Mauta (540 m above sea level) and enter the Argentina above the bridge. Here we come to the first attractive part under the bridge, saving the usual running distance up to this point.

Tour: (machine translated)
For Grognardo see there !
After the entry under the Ponte di Muota, you start with a jump, then come to the highest step, which can also be tackled with jumps. Then a longer running section until the exit with some optional jumps and the slide into Lago Degno round off the tour.

Return: (machine translated)
Where from the right (west) the Grognardo flows into a large pool of the Argentina (so-called Lago Degno), at its lower exit first over rock, then follow the track up to the right to the approach path and on this back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Argentina DC. Départ au dessus du pont de Loreto, le premier encaissement au niveau du pont de Mauta est magnifique, tout peut se sauter (ou tobogans) sans mettre la corde vu le niveau d'eau et les vasques bien profondes.Un spot qui mérite amplement sa note, l'arrivée dans la vasque du Lac degno est superbe.Parcouru en 2h à 2 en prenant notre temps, on a ensuite remonté RD pour enchainer Grognardo qui vaut le coup.Sortie par les cordes fixes RG avant la vasque du lac Degno, pour rejoindre le pont de Mauta et le parking près du pont de Loreto (20mns) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2960/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Argentina Descendu après le Grognardo. Les deux canyons vont de paire. Court mais joli, ensoleillé et ludique. Magnifiques vasques.Approche : Parking au dernier lacet avant Molini di Triora. Chemin qui part dans l'épingle, peinture blanche et bleue à suivre 20 min jusqu'à une passerelle en bois où débute la descente du Grognardo. Sortie à la main courante RG avant le Lago Degno. Cela permet de rejoindre en 15 min le Ponte di Mauta où commence le canyon de l'Argentina. Sortie au Lago Degno, chemin en RD pour retrouver le même sentier qu'à l'approche. Descendu avec Titi l'anguille. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2960/observations.html)
