Automatisch importiert von Descente-Canyon.com für Canyon Larri (superior) Low flow for this canyonToday the canyon is completely rebolted, we added some new anchors and the local GRIMP and speleoclub behind us added new anchors. They also took all the old and broken anchors away (thanks for that). Also the 2 last rappels (jump and slide) are bolted. Hope nobody steals them.And 3th rappel is possible to jump from the top, nice jump. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21428/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Larri (superior) DC OK, aucun problème avec ce débit très soft.Magnifique canyon.Sur la marche d'approche, arrivés au petit col, redescendre vers la cascade ouverte. Approche environ 1h45.Équipements OK sauf sur l'un des derniers rappel où il n'y a qu'un seul point. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21428/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Larri (superior) State of all anchors was good. Other Belgian team drilled an extra anchor at the last abseil of the upper part, to deviate the abseil (too much water in the V-shaped abseil ca 200 liters).Lots of water movement after the big 55m abseil. Need good swimmer to get passed.Only for experienced teams! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21428/observations.html>)

Super conditions caught. Great scenic views. For the way back I recommend to walk orographically down to the right = variety and some views into the forbidden Larri inferiore. (machine translated)

Chain stands (or 2 single) throughout, one chain left only on one anchor. Incredibly beautiful panorama. Water level currently rather low, top conditions. Good walkers manage the approach also in 2 h, you have to go up to 2130 m, then down again 90 hm. Time in the canyon rather 3-4 h. (machine translated)
