Summary: (machine translated)
Relatively open forest gorge

Hydrology:

Access: (machine translated)
In Geneva (after the border), we join the A 40 highway (Autoroute Blanche) in the direction of Lyon. We drive on this highway for about 75 km. We come to a highway junction and drive another 9 km in the direction of Lyon (A 42). Then we leave the highway and drive to Amberieu-en-Bugey. On reaching the outskirts of the town, we turn right onto the D 1075 (formerly the N 75).
After driving about 2 km in a south-westerly direction, this road turns left at an elaborately constructed junction in an easterly direction (straight ahead is the D 1084). We continue for less than 8 km and then turn east at a traffic circle towards Vaux-en-Bugey. In this town, we take the D 60 A in the direction of Cleyzieu. From the center of the village, we drive straight on for about 4 km in a SSE direction. The road then turns east. After this change of direction, there is a dirt road coming up from "our" stream, opposite which is a parking bay where we park the lower vehicle.
We continue with the other vehicle; the road now climbs slightly and quickly gains height in a few hairpin bends. At the top, we turn right at a T-junction instead of left towards Cleyzieu. After a few hundred meters we reach the road bridge over the stream. Park the top vehicle here.

Approach: (machine translated)
We go downstream, first the forest path on the orographic left bank, then in the streambed and after a few minutes we come to the first rappel.

Tour: (machine translated)
Not unattractive canyon when water flows. Comparatively open with a longer walking passages on a path on the left bank after the third higher rappel (C 16).

Return: (machine translated)
The exit from the gorge ends at a small brick water intake. From here, take the forest path that initially runs to the left of the stream, later crosses it and reaches the tarred road for the first time at the lower vehicle.
