Summary: (machine translated)
Open rappel canyon in orange red shale

Hydrology:

Access: (machine translated)
From Nice 54 km up the Var valley on the N 202 towards Digne. Then turn right (north) onto the D 28 into the Vallée de Cians. First through the Gorges de Cians and later in serpentines into the upper canyons. About 17 km after the turnoff, you pass through two tunnels at the "Petite-" and the "Grande Clue". About 200 m after a red wall with inscription plates (behind it a drinking water tank) we park a vehicle just before the next tunnel (between this and the next tunnel the road crosses the Challandre).\nWith the second vehicle (if available) we continue for 2.2 km. Here at the marker post "70" we park it.

Approach: (machine translated)
From the marker post "70" (1250 m a.s.l.) we follow the path that first goes up in serpentines and then moves south along the slope with a moderate gradient to a col (= saddle; 1460 m a.s.l.). Here we leave the path and follow another one on the left down to the Challandre. A few hundred meters we can follow the stream downhill without already having to put on the wetsuit.

Tour: (machine translated)
At the beginning river walk, then 12 rappels in an open canyon with southern exposure, hardly any jumps or slides, water mostly naturally turbid.
Great ambience.

Return: (machine translated)
After the last waterfalls - which you can also bypass on the left bank - right up to the road and around the right tunnel outside to the lower vehicle.
