**Summary:** (machine translated)

Raw data import from Ropewiki <https://ropewiki.com/Mundbach>

Canyon that was made a long time ago. In 2021 the upper part was refitted, the lower part, which consists of open waterfalls, is still more of an "adventure" canyon. With 80m of rope (exact length still needs to be checked) you can rappel directly from the bridge {{pic|encaissement.jpg ~ Beautiful rappel in the upper part}} (machine translated)

New round in Mundbach, now we are down to Talgrund, have set new anchors everywhere. (machine translated)

We redrilled the upper parts, then we went out via the Suone because we had run out of anchors. You need an 80m rope to rappel from the bridge. (machine translated)
