Specialities:

Gear:

Summary: (machine translated)
Dry canyon almost a collector's item but with magnificent views and a spectacular R75. We can leave it on the GR if we want to avoid the hard climb. Better with two cars.
Attention not suitable for beginners!

Hydrology: (machine translated)
Before R75 to the right and on the GR to the right

Access: (machine translated)
We must be located in Cortes de Pallás, which we will reach by the CV428.
Once in the village, we will cross it almost straight ahead in search of the Cta de la Muela. We will follow this road up to the pass where we will find the GR on our right (Cruz del Collado). Here there is a place to leave the return car or if we only have one car.
We will follow the road for about 5.5 kms until a straight road that has a left curve at the end and a track on the right, here we leave the access car.

Approach: (machine translated)
If we only have one car we will have to go by the road those 5,5 kms until the track.
Along the track we will go down to the dry riverbed. After 200m we will see a path on the right that will take us definitely down to the dry riverbed.

Tour: (machine translated)
A couple of abseilings and rappels to approach the cirque of the magnificent R75 (great caution), then a few shorter abseilings before the junction with the GR where we can escape. If we continue to the reservoir we will do 3 more rappels.

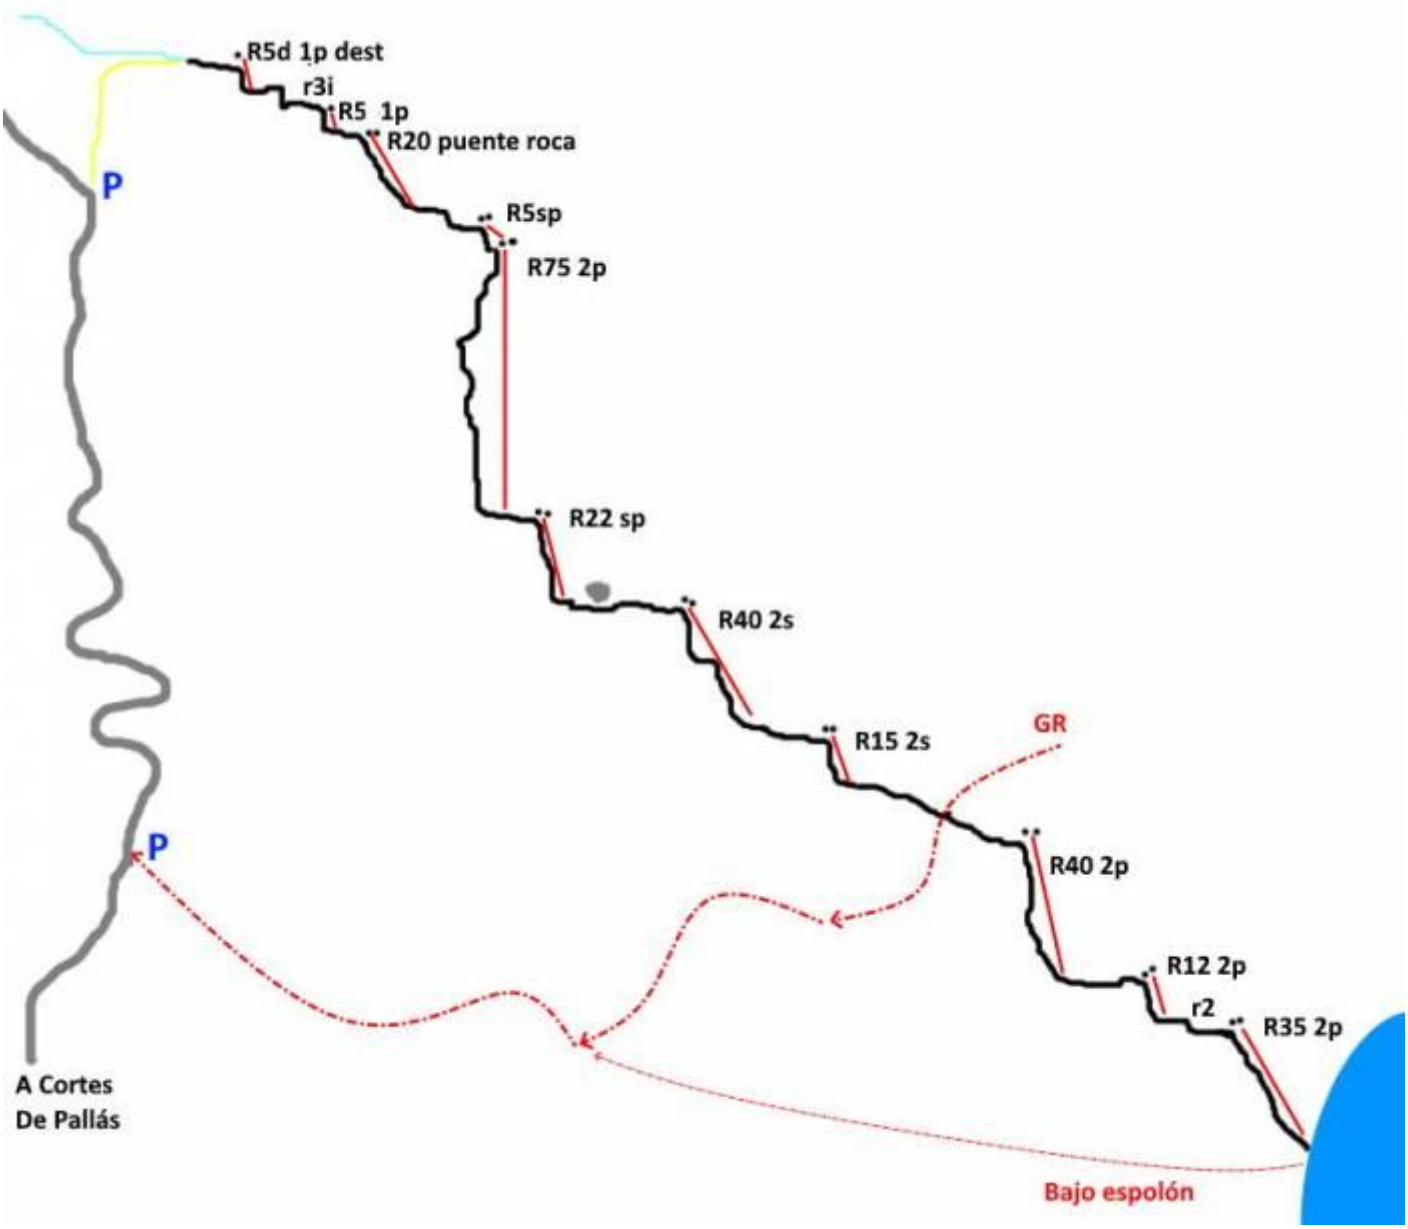

Return: (machine translated)
If we reach the reservoir, we will go to the right and through the watercourse under the spur we will follow the wall to the GR.
By the GR towards the pass where we parked, you can't miss it.
