Country: Portugal **Region:** Região Norte / Norte Region **Subregion:** Viana do Castelo **Town:** Germil		
Difficulty: not as difficult	**Grading:** v3 a3 II	**Total time:** 3h30
Approachtime: 20min	**Tourtime:** 3h	**Returntime:** 10min
Altitude entry: 960m	**Altitude exit:** 150m	**Delta Altitude:** 810m
Canyon length: 1500m	**Highest rapell:** 15m	**Amount rapells:** 2
Transport: Car optional	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 3 (2)	**Info:** ★ 2 (1)	**Belay:** ★ 3 (1)

Specialities:

Gear:
Ropes: 2x40m

Summary: (machine translated)
Entertaining open beautiful granite gorge; longer walking and downclimbing passages; several emergency exits possible; large catchment area; in the ideal case everything can be slid or jumped except for 2 steps; very beautiful pools with clean mostly warm water; is often commercially entered; some slippery downclimb passages; well equipped; drill hooks for rope traverse or ropeway available; in midsummer a 3mm neoprene is enough because the water is warm.

Small tip: Stop at the campsite "Lima Escape (down by the main road) cyclists and hamburgers...

Date 30.05.2016

Hydrology:

Access:
Desde España por el embalse de Lindoso (OU540) hacia Portugal o desde Ponte da Barca hacia España por la N203.
A la altura del puente del Río Tamente giraremos hacia Ermida por la CM1348 y seguiremos por la CM1349. Pasaremos Froufe y tras pasar Lourido tendremos una curva a derechas con el río a nuestra izquierda abajo. Aquí hay una zona para aparcar el coche de retorno o si solo llevamos uno.
Con el coche de acceso seguimos por la carretera y justo al lado del puente sobre el río tenemos mucho sitio donde aparcar.

Approach: (machine translated)
(with 2nd car: 0min)
From the parking exit (approx. 220m) follow the road for approx. 20min to the bridge with the large turnout on the left. Directly at the signs Lago4 you descend 20m to the stream.

Tour: (machine translated)
The tour starts with a nice 8-12m jump in a large pool (bolts left). This is followed by a longer walking and abseiling section which is not boring due to several possible jumps. Caution is advised on some slippery downclimbs as there are often hidden stones under the water surface. In the middle of the canyon, there are then two compelling rappels (10/15m), interrupted by a short walking passages with possible jumps (4/7m). The 15m rappel is followed by another longer walk and downclimb into a somewhat narrower canyon. Here you downclimb skillfully over slippery rocks before reaching the last steps. The first steps are usually bypassed on the right using a traverese rope that can be pulled off (watch out for the first pool, which often recedes). This is followed by a cascade of 5 and 15m which can be jumped and slid/jumped and rappelled or only rappelled (be careful with the last edge due to the current/fall). After the last deep pool you leave the canyon after approx. 100m on the left side.

Return: (machine translated)
Approx. 100m after the last pool, a small path is visible approx. 150m left. Follow this path for about 10 minutes up to the road.
