Summary: (machine translated)
Rappel canyon in the suburbs of Locarno

Hydrology:

Access: (machine translated)
From Locarno up to Minusio. Park the lower vehicle at the lower edge of Brione sopra Minusio (see map sketch in Nizzola's Eldorado Ticino, p. 291).
With the second vehicle through Brione sopra Minusio in serpentines upwards. At the road bridge at 467 m a.s.l. water level checkable. Continue in the direction of Viona. At 700 m a.s.l., after a bend to the right (inn on the right, open chapel a little below on the left), you reach the stream. Here second vehicle in a suitable place (in Switzerland, only a few places are suitable - all "private") park.

Approach: (machine translated)
From the road next to the chapel (north of it) few stairs down to the dam with old water drainage.

Tour: (machine translated)
As Nizzola writes in his book, best to walk in spring or after rains.
Relatively much deadwood in the canyon. Only before the road bridge at 467 m above sea level repeatedly good exit possibilities. From there on also - temporarily - slight odor nuisance. From the whole settlement that crosses the canyon, you see almost nothing except the road bridges.

Return: (machine translated)
At 240 m a.s.l. (immediately after passing under the 4th road bridge, turn right out onto the footpath (beyond the footbridge on the left at the artificial stone wall modern fountain)and on the path in a southwesterly direction to the road and the car.

We did the trip after rain. Lot of trees in the canyon, okey canyon, probably better options available.

Automatisch importiert von Schlucht.ch für Canyon Navegna, Wasserstand: "Mittel - hoch" Verankerungen: "Ok" Viel Holz, v.a. im unteren Teil erfordert solide Abziehtechnik, um Seilverklemmer zu vermeiden. Schön dschunglig wie immer. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1101-navegna)
