Automatisch importiert von Descente-Canyon.com für Canyon Milhommes Parcouru dans le cadre d'une formation rééquipement pour la CD06 FFCAM. On a passé tout Milhommes sur scellement inox. Viré les vieux ancrages, vieilles cordes pourries et repositionné la déviation pour éviter le gros retour au sol possible. Aucun bassins à éviter. Rio sec coulait jusqu'à la confluence mais n'a pas coulé ensuite. Quelques ancrages ont été abîmés dans Rio sec, principalement les seconds ancrages (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21181/observations.html)
