Summary:

Hydrology:

Access: (machine translated)
1. Rio Escabas Bridge. On the road that takes us from Fuertescusa to Poyatos (CUV-9031) at the height of the camping the serranía take the road that goes to the right (Tragacete direction), about 3km approximately we find the bridge and a couple of parking lots, where we will leave one of the cars.
2. Parking Cabecera. From the village of Poyatos on the CUV-9031 towards Beteta about 2.5 km before a curve there is a road to the right.
There we will leave the car.

Approach: (machine translated)
1. With car combination (From the parking lot at the head of the trail). We continue along the track that will take us directly to the bed of the stream of the pasture.
2. Without combination of cars (From the bridge) by the road where we have come, we must look for a small path little marked on the right hand side and ascending doing Z until the top of the Quebrada slope. Then we will find a comfortable and marked track up to the beginning of the ravine (See track).

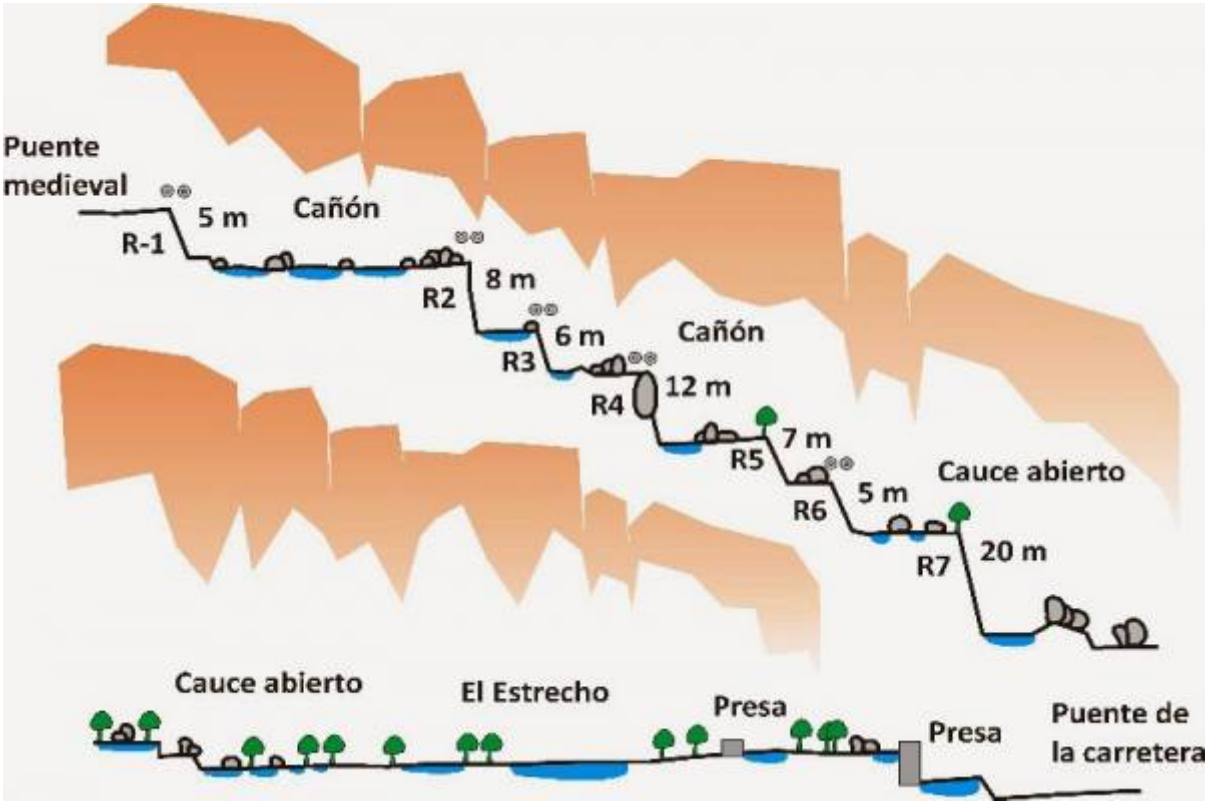

Tour: (machine translated)
The first part of the descent is usually dry and canyon-like, until small springs begin to bring water to the canyon. The second part of the canyon becomes an open canyon.
After the 20m rappel you can follow paths parallel to the riverbed.

Return: (machine translated)
After the last rappel at the dam, continue along the river and in 5 minutes we will be at the bridge where we will have left the car.
