Specialities:

Gear:

Summary: (machine translated)
Short rappel canyon to be extended in the subsequent Vadone.

Hydrology:

Access: (machine translated)
From Ponte Leccia on the T30 for 4km in the direction of Calvi, then turn right on the D105 and via Costaroda up to Canavaggia. Before the church, we turn left at an acute angle on a dirt road. After 270m the track forks; we stay on the right. 900m further on we pass a cattle barn (on the left of the track). The track makes a 90° right turn and 140m further we park our car. Depending on the condition, we could also take the dirt road on the left to its exit.

Approach: (machine translated)
At the exit of the aforementioned dirt road there is an almost circular area where we start our approach towards WSW. We pass the heights "802" and "748" on the IGN map.we come to the Ruisseau Stazzatellu, Here the path branches. On the way back we come later from the left below. But now we stay up to the right, on the further path we cross the Ruisseau de Pruniccia on an old concrete bridge, After that the path rises slightly and we come to a small plateau. From here we descend "on sight" to the Carcheto.

Tour: (machine translated)
Only 4 rappel, then we pass the Pruniccia coming from the left. Later there is a possible jumps before reaching the old bridge.

Return: (machine translated)
Get off at the bridge and go left up to Canavaggia to the car.\n\nAlternatively, you can continue the tour in Vadone (see there).

Automatisch importiert von Descente-Canyon.com für Canyon Carcheto Parking au niveau de la tombe située en haut de la piste bétonnée qui monte au dessus de Canavaggia. Impossible d'aller plus loin avec notre voiture basse. Nous avons effectué l'enchaînement Carcheto Vadone décrit dans le topo de F. Jordan ce qui évite la navette et la partie finale de Vadone qui est horrible. Approche en 1 h 30. Prendre ABSOLUMENT un pantalon long, sinon, c'est l'enfer. Départ de Carcheto à l'altitude 730. C'est très beau. Des rappels sympas avec de belles marmites où l'on peut parfois sauter. On arrive au pont génois et on enchaine avec Vadone. Sortie RD au sommet de la C40. Au total, 2 h de descente. Grosse galère pour remonter jusqu'au chemin pavé. Là aussi, le pantalon est très appréciable. Retour jusqu'à la voiture en 1 h 40. Au total, ça fait beaucoup de marche pour assez peu de canyon. On a nettement préféré la partie Carcheto. Si on revient, on ne fera que cette partie. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21098/observations.html)
