Specialities:

Gear:

Summary: (machine translated)
Short, not fattening but interesting and a lot of fun in spring. It is very well equipped

Hydrology: (machine translated)
Throughout most of the route

Access: (machine translated)
By the N260 to Sort, once there we turn off on the C13 towards Llavorsi.
We will pass Rialb and soon we have the detour to the right to the ski slopes of Portainé, Roni, Montenartro.
We will go up to Roni, 5 kms, where we will turn left to Montenartro and Romadriu. On this road we will leave the Montenartro exit on the right and continue straight ahead to Romadriu until 600m before reaching Romadriu itself, here we will park. We will have left the final waterfall of our descent on our left about 500m before.

Approach: (machine translated)
We go back those 500m to the Cabrils river to go up it by the orographic right to the small spur and on the other side the access. It has some delicate climbing.
On the orographic left we can also go up it in a slightly longer but less delicate path through the forest. Once we leave the spur on the other side we will continue a little further on and a little further up we will access

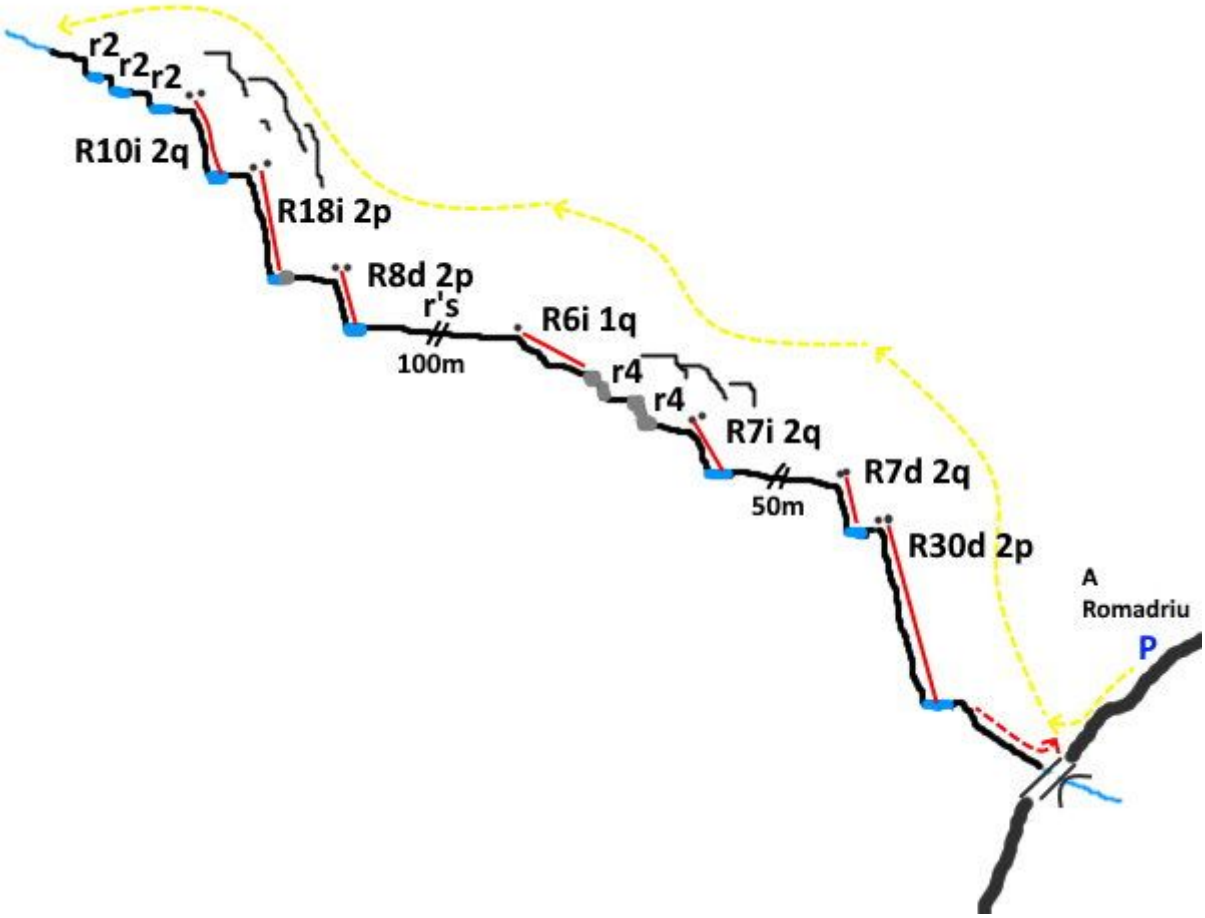

Tour: (machine translated)
Nice descent, nothing fattening, but continuous, fun and with a fantastic final waterfall with good flow.

Return: (machine translated)
After the waterfall, we turn left to go down to the road.
