Summary: (machine translated)
Nourished by the waters of the Aneto that filter in the Forau de Aigualluts and that appear a few meters above, it is an excessively short canyon, it is the only negative point that it has. Great flows in the thawing season, enviable environment and very well formed. We will have to be cautious when it is in high flows.

Hydrology:
Sí

Access: (machine translated)
We will have to go to Es Bordes, near Vielha, in the Val d'Aran. From the Val d'Aran by the N230, or from France by the N125.
Between Bossost and Vielha we will find Es Bordes and here we will turn off to Era Artiga de Lin. We will follow this small road (closed most of the year due to avalanche danger) until almost the end to the parking lot of Uelhs deth Joèu.

Approach: (machine translated)
We continue straight ahead towards the spring, entering right next to it.

Tour:

Return: (machine translated)
After the last blocks, we see a milestone on the left and a path with wooden planks that leads up to the road.
