Country: España / Spain **Region:** Galicia **Subregion:** provincia de La Coruña / Provincia da Coruna **Town:** Villa de Noya		
Difficulty: a little difficult	**Grading:** v4 a2 II	**Total time:** 3h
Approachtime: 40min	**Tourtime:** 2h	**Returntime:** 20min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 500m	**Highest rapell:** 50m	**Amount rapells:** 9
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Very grassy canyon, all in natural (trees), with presence of many mosses, slippery and generally little more than a stream. When the rest of the canyon is over it is a good option because it has a good stream that will make it very fun (without being dangerous). In the final part we will have to be cautious because the rappels are more exposed.

Hydrology: (machine translated)
Difficult because of the closed forest but we should have no problems with the descent and we can always rappel from trees outside the riverbed.

Access: (machine translated)
By the CG 1.5 exit 27.
We will have to go towards "Hotel Pesquería del Tambre" or to the hydroelectric plant. We will park there

Approach: (machine translated)
From the power station to the suspension bridge, take the marked path that goes up and jump the fence to go through the channel to go over our ravine, soon a wooden bridge to cross the channel and start climbing in the middle of nowhere to a rope that gets us into the forest. There is a kind of path that takes us to the head of the ravine.

Tour: (machine translated)
Simple and very fun after rainfall although the water never stops flowing

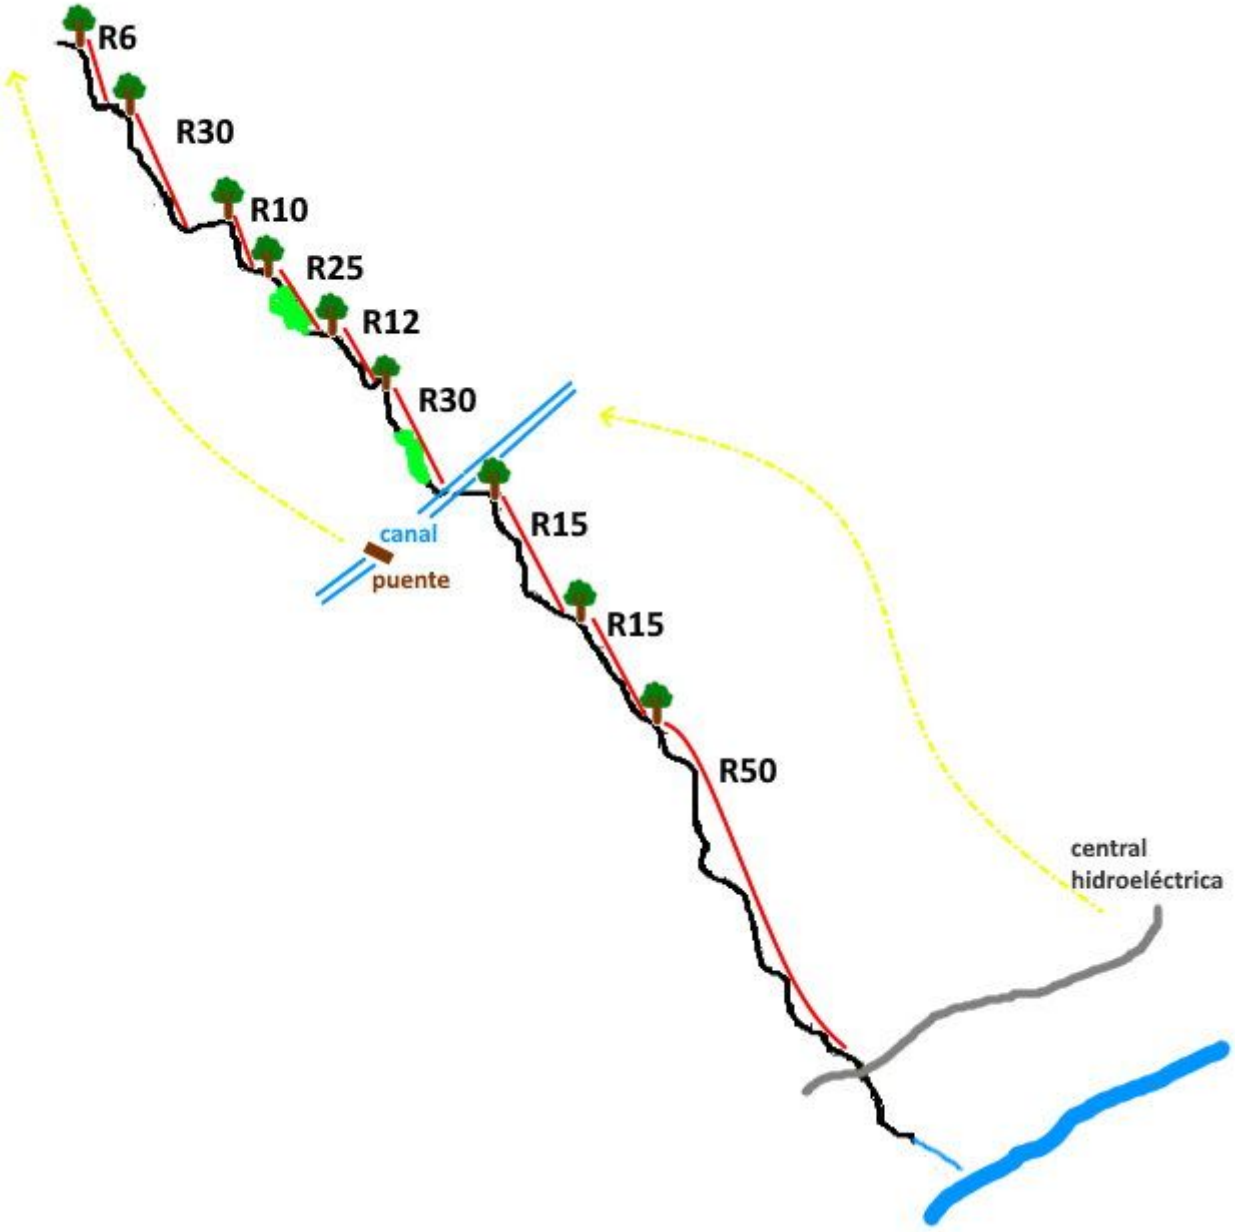

Return: (machine translated)
After the last rappel, we will continue to the path that leads to the power plant.

Coordinates:
Canyon Start 42.8019 -8.8694
