| Summary: (machine translated) Conglomerate rappel canyon | | |
| Hydrology: | | |
| Access: (machine translated) From the Barbastro - Huesca road (N-240), about 25 km after Barbastro, turn right on the A-1229 towards Abiego, Rodellar. A few hundred meters after Abiego, turn left towards Bierge. In doing so, we cross the Rio Isuala, which we will later go up or down in the Estrechos de Balcés. We take a first cautious estimate of the water level at the bridge. A few meters before reaching the village of Bierge, we first turn right, but then immediately left, towards Rodellar, "Barranco de Mascun". 6.8 km after this intersection, in a prominent left turn, there is a suitable area to park our car. a second vehicle we can park either at the large oak tree at the starting point of an ascent of the Cueva Cabrito (cf. there) or at the bridge over the Rio Izuala on the road from Bierge to Adahuesca. The choice of the alternative depends on the chosen way back (cf. below "Exit"). | | |
| Approach: (machine translated) From the meadow, which is fenced off from the road, 2 slopes lead off in a northerly direction. We take the lower (eastern) one and follow it, initially in a northerly direction, later more in a north-westerly direction. We ignore the turn-offs to the right and left. On the ridge between the Bco. Cueva Cabrito and Alborceral we meet a track coming from the left, which we follow downhill to the right for about 100 meters. Here a path marked with cairns turns off at a right angle and leads us through undergrowth to the entry (700m above sea level). Access can also be via a left tributary, see Canyonisme - La Sierra de Guara. Randonnées, Randonnées acuaticues. Patrick Gimat, 2005 on p. 164 ff. | | |
| Tour: (machine translated) 10 rappels, see photos and video | | |
| Return: (machine translated) On reaching the Balcés Estrechos (Rio Isuala) either upstream, past the mouth of the Cueva Cabrito and then up the ascent path from the Cueva Cabrito to the parking lot under the tree (2 hours, see there) or down the Estrechos to the bridge on the Bierge - Adahuesca road (3 hours) | | |

Automatisch importiert von Descente-Canyon.com für Canyon Alborzeral Très beau canyon MAIS ATTENTION :- Approche compliquée, malgré les différentes topo et notre carte. Canyon Très peu pratiqué donc les sentes sont introuvables. Certains cairns mènent nul part! Nous avons mis plus de deux heures à trouver le premier relais. (On pense avoir utilisé l'entrée numéro 2).- les relais restent vieillissants malgré nos réparations (on a spité, revissé, changé des sangles et une main courante). Prévoir absolument de quoi réparer les relais endommagés par les crues.- en bas du dernier rappel, tournez bien à gauche car à droite vous iriez dans les estrechos del balcez. - nous n'avions que les bas de combi mais les vasques d'eau croupie étaient très froides et profondes. Les hauts de combinaisons auraient été nécessaire. - le sentier du retour, situé en rive droite du balcez, 250m après être sorti d'Alborzeral, se trouve assez facilement grâce au cairns. Très beau canyon mais pour une équipe confirmée. Mériterait d'être plus pratiqué et entretenu. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2821/observations.html>)
