Specialities:		
Gear:		

Summary: (machine translated)
Dry and very vertical canyon, which practically chains rappels from the end of the via ferrata to the starting point of the same. It is a committed canyon, but very interesting to complete the via ferrata and make the return. Installations in monopoint, many sections can be dexterous (not recommended) decomposed rock and rock falls. Last rappel flown 40m approx (reequipped 2pb with chain).

Hydrology: (machine translated)
Impossible once started

Access: (machine translated)
From Malaga to Pizarra and from there to Alora. Once in Alora take the detour to El Chorro.
In the village follow the signs to the Via ferrata, it is simple, at the entrance of the village, at the bar next to the tracks, follow the street on the right, the bar street straight ahead until you leave the village, there is a fork in the track, on the right goes the GR and on the left the access to the VF.

Approach: (machine translated)
By the VF we will go up to the last bridge where we will cross over the ravine, from here we will be able to crown the needle by the back part until we find the rappel installation (27m) or continue descending with the ferrata until the pass that gives access to the ravine (under the bridge) where we will find another installation (R15).

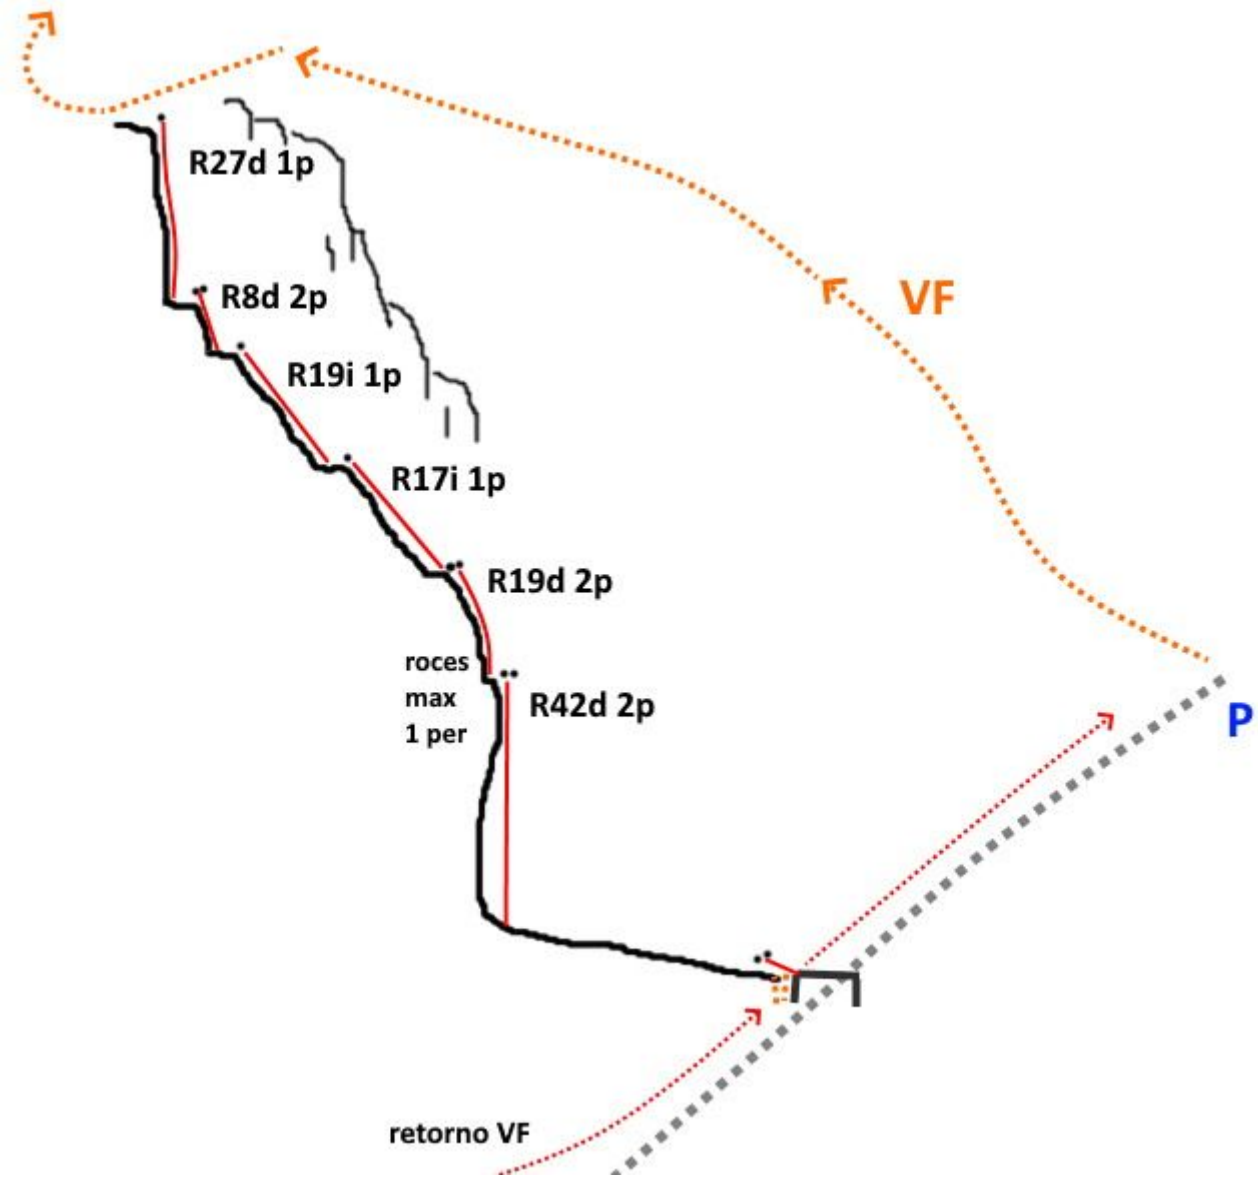

Tour: (machine translated)
Very vertical with the final climax of the cantilevered rappel.

Return: (machine translated)
After the last rappel, walk down to the left to approach the train tracks, to rappel or climb up some clamps to the ground, then walk left to the end and climb up some clamps to the start of the VF.
