| **Difficulty:** a little difficult | **Grading:** v4 a2 III | **Total time:** |
| **Approachtime:** | **Tourtime:** 3h | **Returntime:** 25min |
| **Altitude entry:** m | **Altitude exit:** m | **Delta Altitude:** |
| **Canyon length:** 2500m | **Highest rapell:** 61m | **Amount rapells:** 11 |
| **Transport:** Car required (all-wheel drive) | **Rock type:** | **Drainage area:** km² |
| **Season:** September - May | **Orientation:** | **Best Time:** |
| **Rating:** ☆ 0 () | **Info:** ★ 0 () | **Belay:** ★ 0 () |

**Specialities:**

**Gear:**

**Summary:** (machine translated)
Gully to be done after rains. When dry it loses a lot of charm. Its long rappels and somewhat exposed headwaters provide excitement to compensate for the long access.

**Hydrology:**
– TODO –

**Access:** (machine translated)
We must reach the village of Fuertescusa. To do this we reach Cañamares by the CM-210 and Betet direction, the first detour to the right is the CUV-9031. We continue to Fuertescusa and after 5 kms we will see a track that goes off to the right and down to the river. Cross the bridge over the Escabas river. We pass a detour to the right and take the next one. From here, depending on the state of the road, we will park.
With two cars (SUVs): with one we continue to the bridge of the Labrada by the track and with the other we will go up the track that was on the left and that goes to the upper meadows.

**Approach:** (machine translated)
A car: at about 800 meters we see some ruins and a path to the left, from there we start to climb guided by the points of the trees. We continue straight ahead along the hill between two small ravines making our way through the paths that mark the animals among the rosemary. Upon reaching a milestone we turn slightly to the right until we enter the ravine.
We advance along it until we reach a small climb, which we will overcome on the right. We will continue ascending between vegetation following the marks, until we reach the base of a peculiar rock that the people of the area call the lizard, which will serve as orientation throughout the access. Once here we only have to descend following the marks to the bed of the ravine.
Two cars: on foot we will descend parallel to the bed until it begins to have interest to adéntranos in it,
about 15 minutes.

**Tour:** (machine translated)
Lots of vegetation in the riverbed. Carry a machete

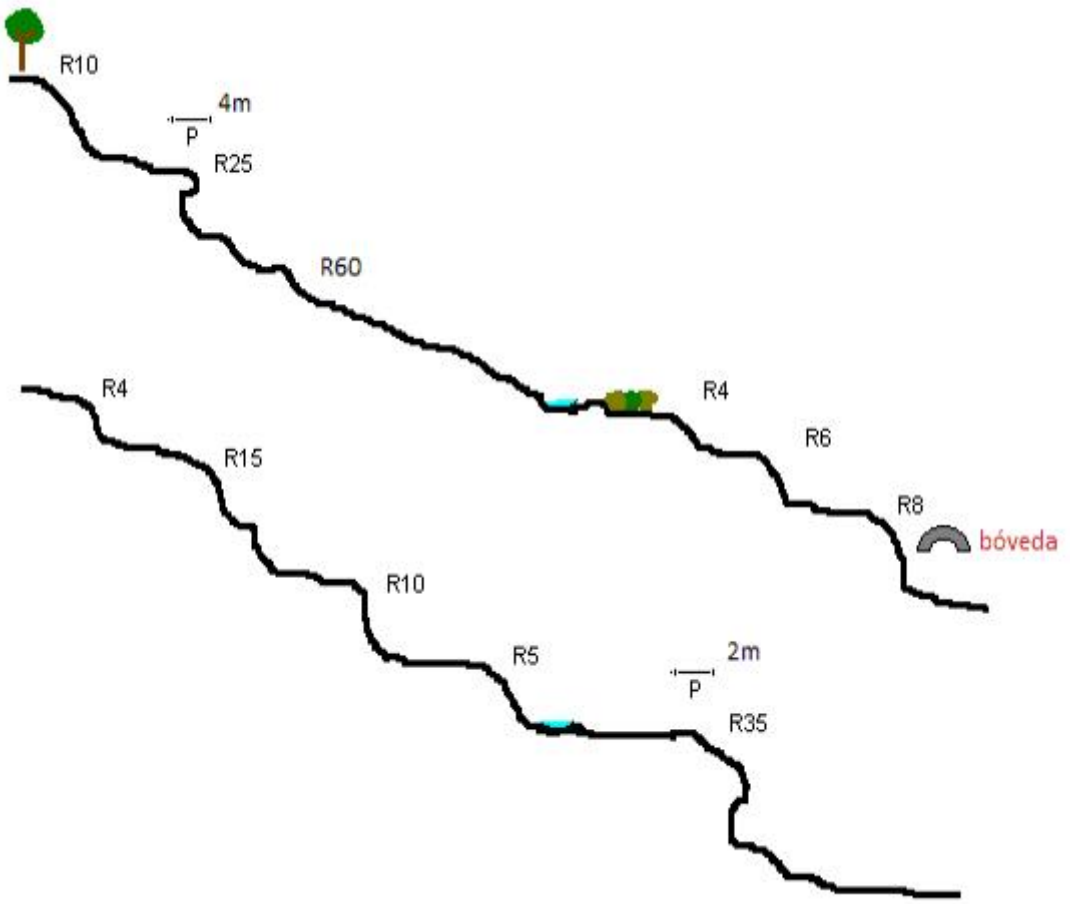

**Return:** (machine translated)
At the end of the ravine, we take a ramp to the left that after a short stretch leaves us on the road where we have parked.

**Coordinates:**
Canyon Start 40.4490 -2.1812
