Country: Italia / Italy **Region:** Liguria **Subregion:** Imperia **Town:** Ponti di Pornassio		
Difficulty: not as difficult	**Grading:** v3 a3 III	**Total time:** 3h50
Approachtime: 40min	**Tourtime:** 3h	**Returntime:** 10min
Altitude entry: 540m	**Altitude exit:** 400m	**Delta Altitude:** 140m
Canyon length: 1400m	**Highest rapell:** 15m	**Amount rapells:** 16
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:** North	**Best Time:**
Rating: ☆ 2.9 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 1x30m

Summary: (machine translated)
Attractive forest gorge

Hydrology:

Access: (machine translated)
Leave the A 10 highway (Genoa - Ventimiglia) at the Imperia - Ost ("Imperia-Est") exit and head north on the SS 28 towards Pieve di Teco (Colle di Nava; Turino). After a good 23 km we reach Pieve di Teco and 2 km after the village we turn left off the SS 28 onto the provincial road towards Mendatica/Monesi. After a further 2.5 km (from the junction), the road takes us over the River Aroscia (immediately after the bridge on the left is a good parking area for motorhomes). After another kilometer, we enter the village of Ponti di Parnassio. Right at the start, there are parking spaces to the left of the road where we can leave the car.
If you are coming from the Genoa area on the A 10, turn right at the "Albenga" exit onto the SS 582 towards Albenga and then immediately turn right again onto the SS 453. After around 26 km, you will reach Pieve di Teco. Continue as above.
In the indicated locations another parking lot is suggested and accordingly an access from the beginning on the orographic left side of the Rio S.L.
We can also park in the middle of the village, but then we have a problem with putting on and taking off the Neos.

Approach: (machine translated)
We continue to follow the road - on the right there is a turnoff over the Rio Aroscia into the historic old town - and then turn left up the next street. Passing under some arches, we reach the last houses, where the road becomes a dirt road that we follow until we reach the bridge over "our" stream (Here you can check the water flow). We pass under the porch of a chapel and continue uphill. After the forestry road has returned to the stream, it makes a right turn and shortly after, the path goes down to the left to the stream. It is marked with "Procanyon" markings (blue dots on white rectangle).

Tour: (machine translated)
A lot of downclimbing; further on some attractive narrow sections with possible jumps and a super slide.

Return: (machine translated)
Turn right at the water drainage, downhill to the bridge and from here on the access path back to the village. Once you have parked your car in the alternative parking lot, continue down the stream almost to the road.

Coordinates:
Canyon Start 44.0572 7.8481
Canyon End 44.0639 7.8500
Parking Entry and Exit 44.0652 7.8556

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) Pour trouver l'accès : une centaine de mètres avant une épingle à droite, un cairn et quelques rubalises marquent un chemin à gauche pour descendre au début du canyon (nous n'avons pas trouvé les marques de peinture). Joli canyon, sauvage. Un chevreuil mort après le toboggan de 8m, vers le début du canyon, en plein milieu du torrent. Descendu avec Titi l'anguille. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) Les amarrages détruits lors de la tempête de 2020 ont été refait récemment (l'an dernier?) mais les anciens n'ont pas été retiré. Très peu d'obstacles ludiques mais canyon intéressant et toujours jolie (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) Si comme nous vous ratez la sente qui descend vers le canyon, vous verrez sur votre gauche un chemin en balcon carossable 4*4 herbeux qui passe par dessus le canyon sur un pont en pierre. Puis une sente permet de descendre dans le canyon, ça ne rajoute que 10 mn de canyon. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) Nota per trovare l'ingresso al canyon. Dopo aver parcheggiato la macchina prendere la strada sterrata e risalire esattamente x 1.9 km fino ad incontrare sulla sinistra un cartello appeso ad un albero con la scritta in rosso 5 1/2 a quel punto parte una traccia di sentiero (all'inizio parallela alla strada sterrata) che in 5 minuti porta all'attacco.La traccia è piuttosto evidente ma con l'erba alta può essere difficoltoso individuare la partenza. Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) DC+ amarrages ok mais ayant subi les crues.Le plus simple pour se repérer dans l'approche: sur la piste il y a des numéros rouges, rentrez au numéro 3 (gros chemin) ou plus haut numéro 4 (rubalise rouge blanc) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) On n'a pas trouvé le chemin indiqué sur le descriptif à 60m de l'épingle. On a pris le chemin 200m avant avec une pancarte marquée d'un 5 rouge. Bien sonder les vasques car beaucoup de bloques remplissent les vasques. Ça reste un beau canyon.
