Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Lérida / Provincia de Lleida
Town:

Difficulty: not as difficult	**Grading:** v3 a1 III	**Total time:**
Approachtime:	**Tourtime:** 2h	**Returntime:** 20min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 700m	**Highest rapell:** 35m	**Amount rapells:** 16
Transport:	**Rock type:**	**Drainage area:** km²
Season: September - May	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Dry ravine except after heavy rains with a very interesting formation. Caution with the marmitas trap

Hydrology: (machine translated)
In the first part

Access: (machine translated)
On the N260 between Pobla de Segur and Pont de Suert just before the tunnel we have the detour to the right to Congost d'Erinyá, we get in and just before the bridge over the Flamisell we can park.

Approach: (machine translated)
Loaded with the bags, we cross the bridge and immediately another one over the Moró ravine (exit), after approximately 200m we will see a milestone on the left. Here we will go up a steep slope, climbing in some sections. We will continue ascending by the milestones/mojones as best we can following more or less a line towards the turret of the light. Before reaching it we will find a path that we will follow to the left and that will take us to the beginning of the ravine.

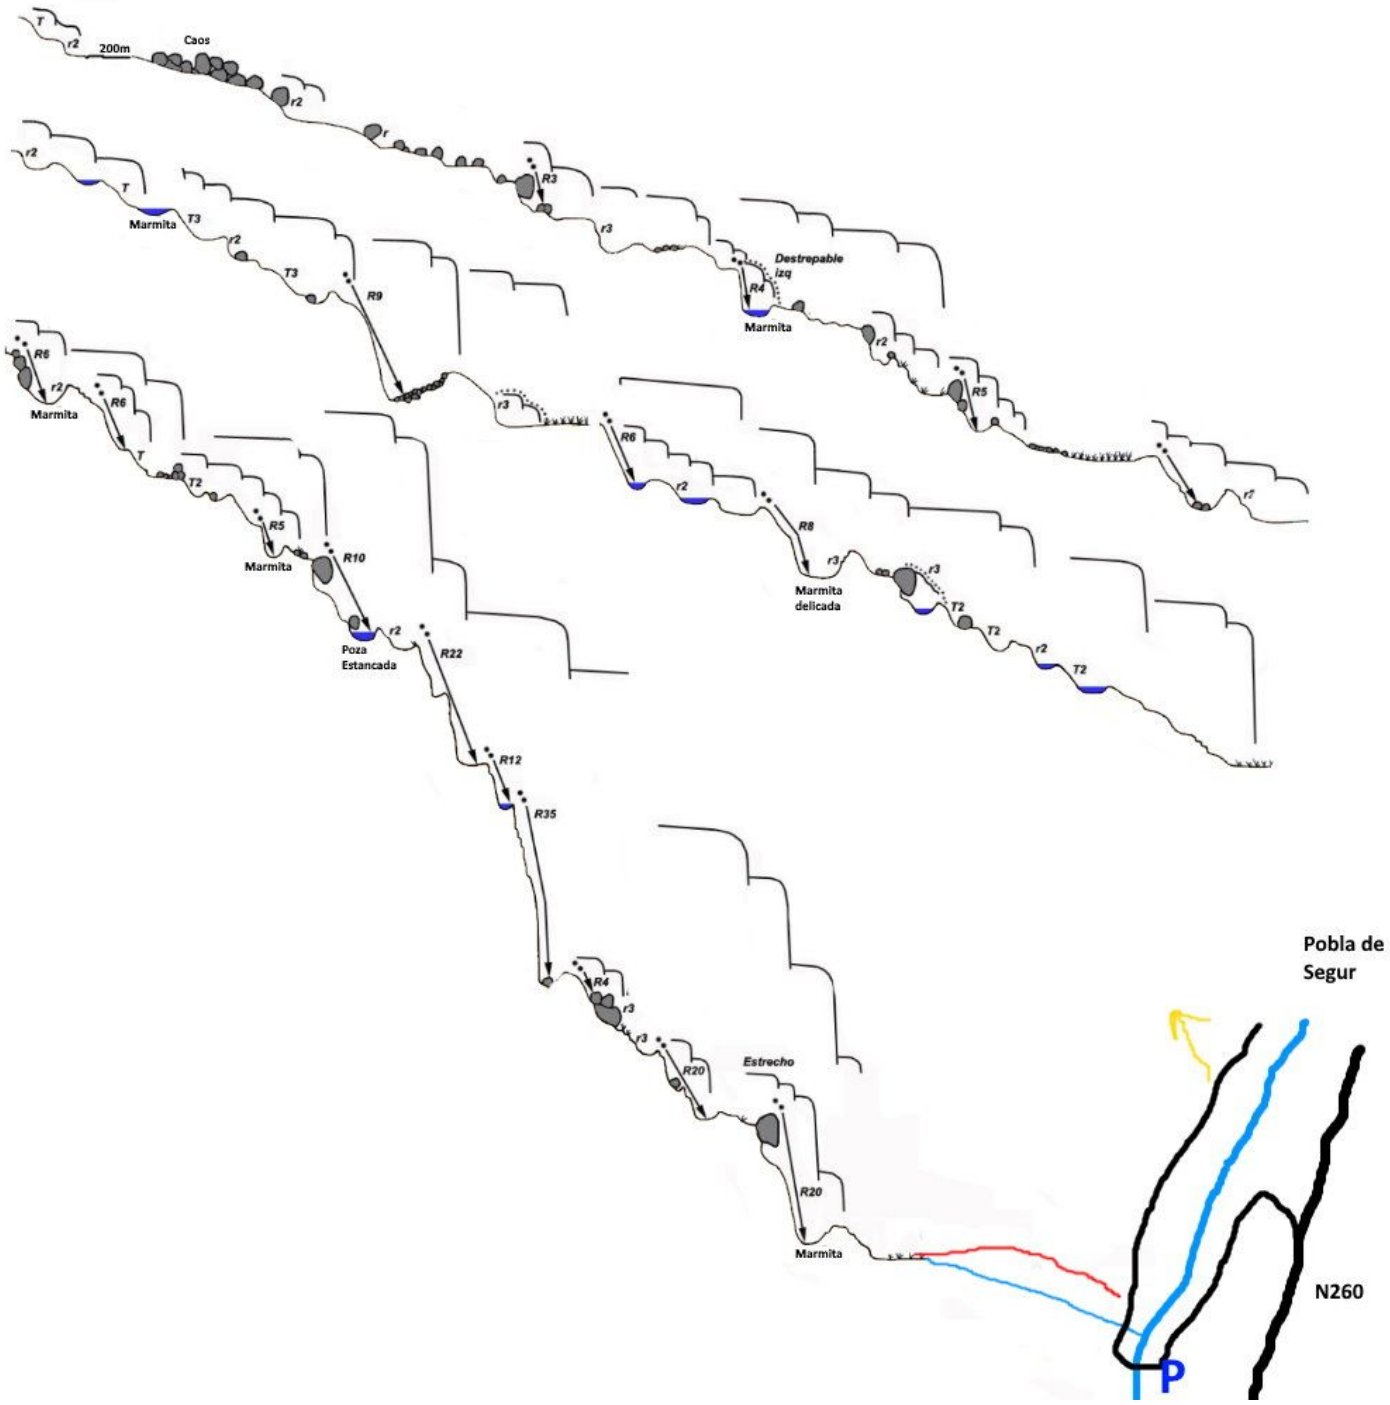

Tour: (machine translated)
A simple first part full of ledges and traps to give way to the most vertical zone with up to 35m of descent, whose meeting does not allow more than two people. Caution with the traps

Return: (machine translated)
Just before reaching the bridge, we will exit to the left
