For once with real water! Nice tour for bad weather/high water levels. All anchors in superiore condition. (machine translated)

Partly slippery to walk in the water. All anchors okay. The ropes on the bridges could be replaced on occasion. (machine translated)

Automatisch importiert von Schlucht.ch für Canyon Vista Biasca, Wasserstand: "niedrig - mittel" Verankerungen: "gut" Griffig zu gehen, schöner Blick auf Biasca; mal offen und sonnig, mal enger und grüner - wenn sonst überall zu viel Wasser läuft, lohnt sich die Tour durchaus. Nice and short alternative if there is otherwise too much water in the other canyons. At each of the bridges there is a chain link attached to the railing with ropes, which can easily be overlooked due to the very open canyon. Apart from the penultimate rappel with mini pool, the canyon can also be walked dry. (machine translated)

Not much for the otherwise quite high water levels. Very easy to walk. (machine translated)

Automatisch importiert von Schlucht.ch für Canyon Vista Biasca, Wasserstand: "mittel" Verankerungen: "Auf Höhe der unteren Steinhütte fehlt am Stand das Plättchen mit Ring. Gut so, der Bolzen ist sehr locker. Am besten vom Stand davor durchseilen (30+ m)" schön griffig, gute Alternative für "rote" Boggera und Nala. At the level of the lower stone hut, the plate is missing from the belay and the bolt is very loose. It is best to rope through from the belay in front of it (30+ m) (machine translated)

Amazingly good canyon for such a small catchment area. Water level was mountain pass after the thunderstorm during the night. (machine translated)
