| Summary: (machine translated) Short but impressive canyon. | | |
| Hydrology: | | |
| Access: (machine translated) Coming from Oloron-Sainte-Marie, we drive 30.5 km in a southerly direction on the N-134 direction Spain (Col de Somport, Jaca). Then we turn right onto the D-239 to Lescun. We drive uphill in serpentines and park our car 3.8 km after turning off the N-134 on the right-hand side of the road. | | |
| Approach: (machine translated) We walk across the meadow below the road down to the river without a path. The literature now recommends access from the other side of the slope. | | |
| Tour: (machine translated) First in the streambed, then we pass a siphon on the left, now stand in a large vault and take the next rappel (38m) in the left chute. There is a lot of spray below the fall, so the rope retrieval should work. The following 2m step is usually jumpable. | | |
| Return: (machine translated) As soon as possible, turn right uphill and in an arc to the bridge - Pont de la Cascade. From here, head northwest back up to the road. | | |
| Coordinates: Canyon Start 42.9329 -0.6258 Canyon End 42.9346 -0.6230 | | |

Automatisch importiert von Descente-Canyon.com für Canyon Lescun Équipements oxydés parfois. Mais très beau canyon bien qu'un peu court. Ça glisse pas mal dans et hors de l'eau. Pour l'accès, préférez l'accès par la RD239 (arrivée à la passerelle par RG) afin d'éviter de passer par la propriété privée.Il y a des ânes en liberté sur le sentier. Bien refermer la clôture électrique. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21661/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Lescun Canyon d'intérêt avec une belle étroiture au début puis un grand rappel final. Les relias sont vieux, certains sont sur mono point...Pas besoin de navette, le retour se fait en rive droite (mais passe par une propriété) ou en rive gauche (chemin difficile à trouver).
