Summary: (machine translated)
In principle, it cannot take place between January 1 and July 15.
http://doe.juntaex.es/pdfs/doe/2018/1580o/18050393.pdf
Access restrictions for private property.
Owners are not allowed to pass through them.

Hydrology: (machine translated)
There is no possibility of leakage.

Access: (machine translated)
From the EX-203 road we turn into Los Naranjos street, we continue along Cerrillo street until the end. We turn right on Las Rozas street, we will continue straight on along the track.
Just before the end of the track we cross a pine forest, from this point there are alternating stretches of asphalted and unasphalted track.
We continue descending to cross the bridge of the ravine of the sickle and from this point we take the roads on the right, better paved. We arrive at a curve to the right, which has a very large sign and warns us of the access through the private estate. This is the point where we have to leave the cars not blocking any of the two tracks.

Approach: (machine translated)
Go down along the fence to the gorge and go along the bed or the bank of the Minchones gorge.
The first gorge that we find on our right is the Chorro de la Ventera ravine.
Go up the bank easily where there is a little marked path but with care and attention, you can access to the base of the Chorro de la Ventera, the highest waterfall in Extremadura with a height of 60 m. Just at the base, take a very little marked path that goes left as we look up and bordering the waterfall.

Info:http://www.veramountain.com/barranquismo-en-el-chorro-de-la-ventera/

Tour: (machine translated)
It is a descent that begins with an abseil of 12 meters high, a jump of 10 meters or a jump to the pool, and then reach the waterfall of the ventera jet: abseil of 60 meters split 20+60 with a wide ledge.
After the waterfall we access an open area to see how the canyon is gradually boxed.
We will arrive at an area where we have a 45m rappel along the riverbed or 30 outside with a 10m handrail and two rappels of 25 and 30 meters.
Once finished the three rappels we begin an area of small rappels and jumps with a maximum height of 6 meters and where we will have to be very attentive and alert to be able to overcome them.

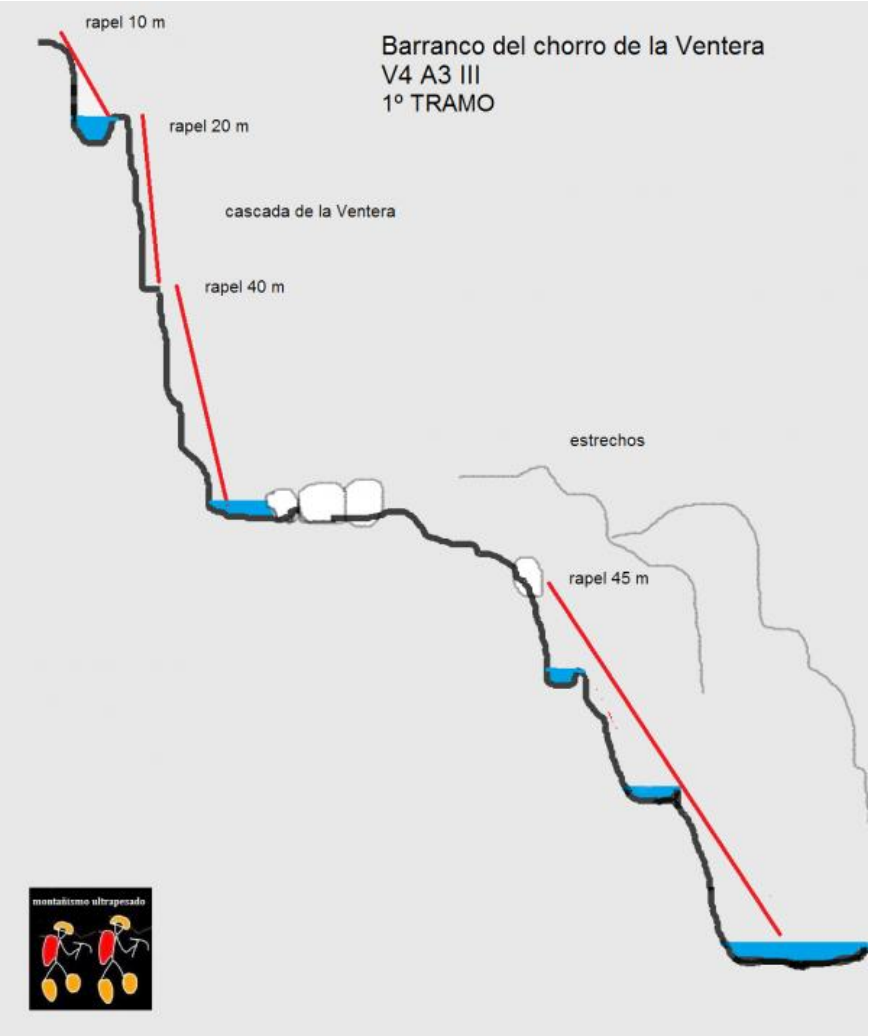

Return: (machine translated)
After about 100 meters from this last pool it is advisable to go out to the road, go down to Minchones and go back the way we have done for the ascent.
