Country: España / Spain **Region:** Valenciana, Comunidad / Comunitat Valenciana **Subregion:** Alicante **Town:** Vall de Gallinera		
Difficulty: a little difficult	**Grading:** v4 a1 III	**Total time:** 2h30
Approachtime: 15min	**Tourtime:** 2h	**Returntime:** 15min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 2000m	**Highest rapell:** 13m	**Amount rapells:** 10
Transport:	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:**	**Best Time:**
Rating: ☆ 3.5 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Sporty, demanding and intense descent that shares a riverbed with the Infern.
A very aesthetic route in white limestone.
During the descent you will test your climbing skills, progression in opposition and handrail installation technique.
Generally dry, it is common to find pools and trap pits with decomposing water. The descent is completely different in case of heavy rainfall.

Hydrology: (machine translated)
Few, in the open areas you can get out carefully to the left (to the road) but there is quite a lot of vegetation.
In the narrow and fattened areas there are no escapes.

Access: (machine translated)
From Pego on the CV-712 towards Vall d'Ebo. We continue towards Alcalá de la Jovada and at km 11 we look for a place to leave the car.

Approach: (machine translated)
We continue along the road and soon we get into the watercourse on the left until we find a house of bottles. We follow the watercourse and the little marked path towards the river.

Tour: (machine translated)
Very demanding, physical and technical progression: Continuous projections, climbs, climbing, climbing skills, steps in opposition and marmitas trap that we will avoid or rappel.
Essential knowledge and material for the installation of recoverable handrails.

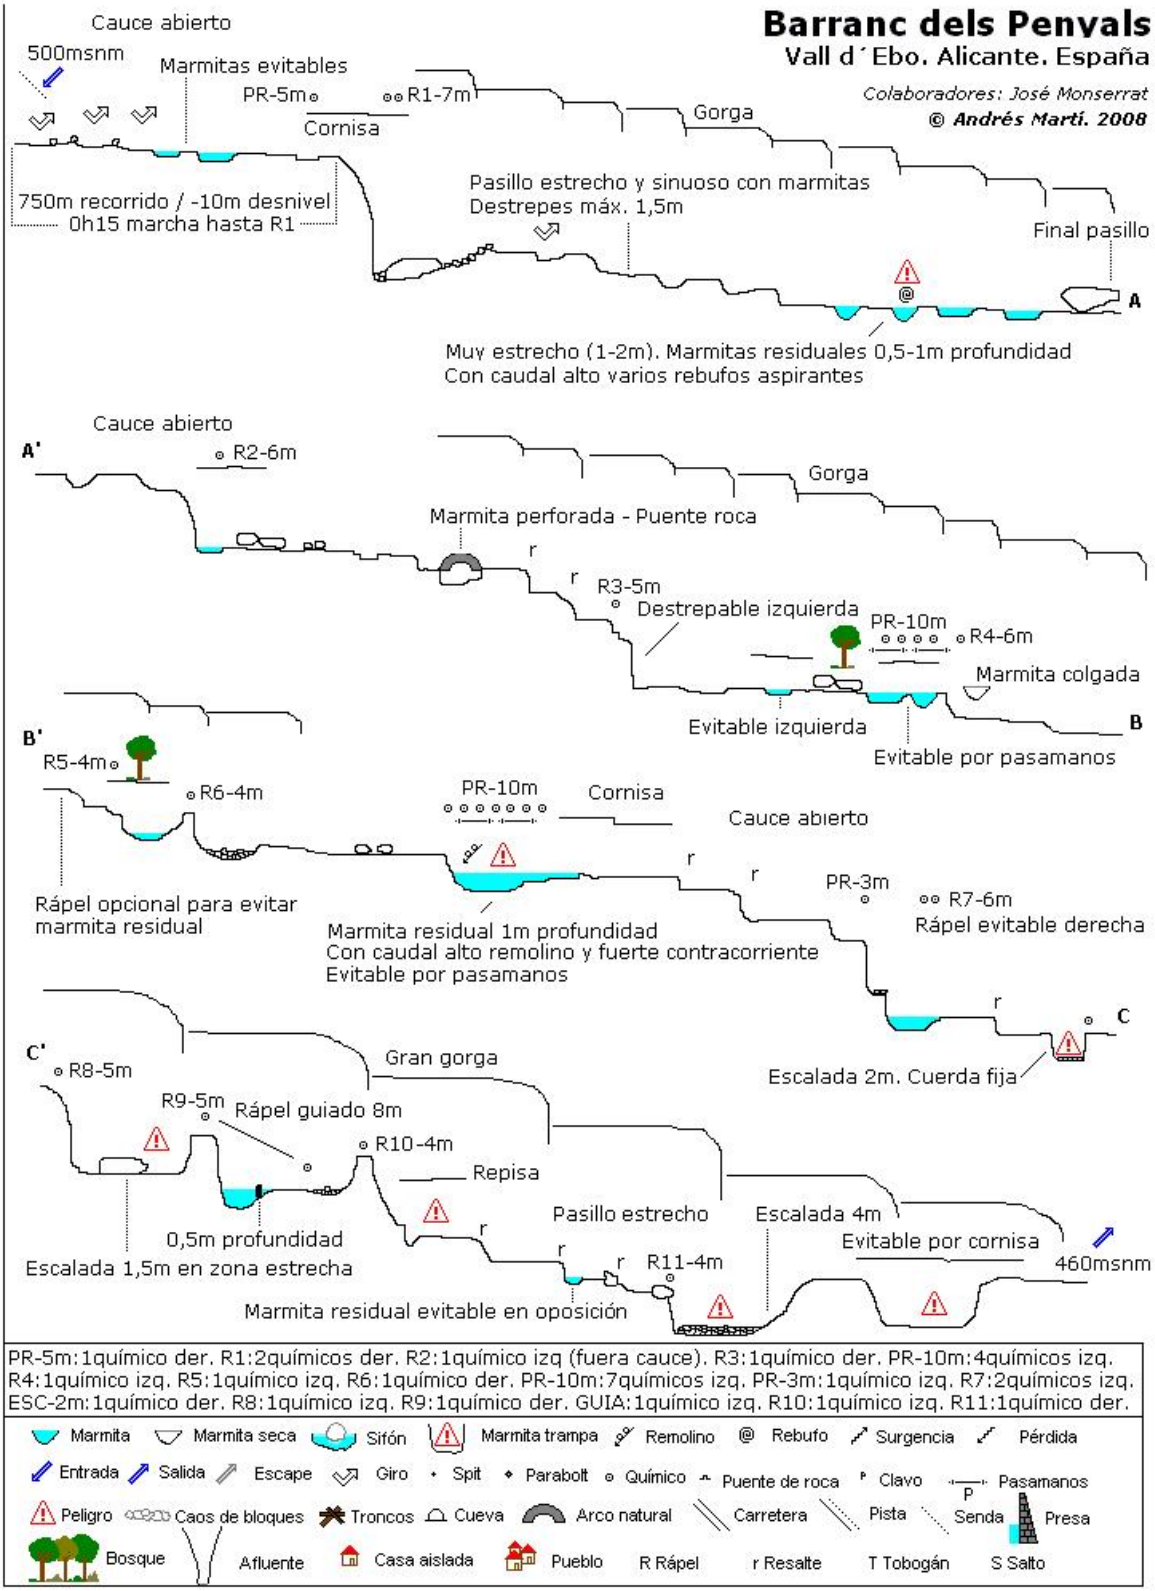

Return: (machine translated)
200m after the last rappel, on the left, there is a steep path, not very well marked with milestones, that leads to the road.

Coordinates:
Canyon Start 38.8020 -0.2007
