Rating: ☆ 3.6 (8)	**Info:** ★ 2.5 (6)	**Belay:** ★ 3 (6)

Specialities:

Gear:
Ropes: 2x40m

Summary: (machine translated)
Sunny, open granite gorge with some jumps (control the depth!) and short rappels, Good Inox belays, Some slippery passages, Eastern exposure, Suitable for beginners

Hydrology:

Access: (machine translated)
From Olbia heading south on the SS131 to the S. Teodoro exit; at the first traffic circle turn right towards Budoni (SS125) -> in the village turn right onto "Via Aresula" -> after approx. 400m there is another traffic circle (only milled) turn right here; after 50m turn left into "Via diLu Carrulu Ecchju" -> drive under the highway (left. Fountain) -> briefly uphill, then towards the stream (from here gravel road with hollows) -> over the stream (concrete stream crossing) -> from here follow the partly steep mountain road for approx. 4 km (some asphalt sections) -> after 4 km there is a long wooden fence on the left with good parking facilities (a house can be seen below).

Approach: (machine translated)
From the parking lot, follow the road for approx. 100m until you see the hiking sign on the left with the inscription "Piscine naturali 0,10". Follow the hiking trail for about 5 minutes until you reach the stream.

Tour: (machine translated)
The Pitrisconi is a beautiful open and varied granite gorge. If the water level is suitable, some places can be jumped, but the depth of the water should always be checked as the color of the water often makes the depth appear deceptive. There are always short walking and downclimbs between the steps. The highest abseiling points are relatively at the beginning of the tour and are well equipped. Once you reach the last rappel, you can abseil halfway down and then jump into the last large pool. After the pool, there is a short walking passage that leads to the hiking trail on the orographic left (exit).

Return: (machine translated)
At 220m, follow the hiking sign on the ortographic left with the inscription "P. ta Pitriolu 0,40". Here you follow the clearly visible and beautiful hiking trail first steeply upwards and then above and parallel to the canyon to the parking lot. You can follow the marked path on the orographic right-hand side back to the parking lot

Coordinates:
Canyon Start 40.7503 9.5910
Canyon End 40.7501 9.6006
Parking Entry and Exit 40.7520 9.5904
Parking at Exit 40.7548 9.5950
Alternative Canyon End 40.7513 9.6142

Reports:

2025-12-27 | Candrea86 | ☆ ☆ ☆ ☆ |🕮 ★ |⚓ ★ ★ ★ | ≋ High | 👍 Completed
After rains last more than a week high flow rate but never difficult. 4 jumps. (machine translated)

2025-11-13 | Philipp | ☆ ☆ ☆ ☆ |🕮 ★ |⚓ ★ ★ ★ | ≋ Low | 👍 Completed
Today at low water, I think the water quality is still quite good but very slippery in places. Jumps are still fun and rappels are easy to do for beginners. A car with a little ground clearance is recommended for the approach. (machine translated)

Scenically beautiful! Nice possible jumps. The condition of the approach slope was okay. (machine translated)

2025-09-23 | Benjamin Großmann | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | ≋ Low | 👍 Completed
Unfortunately very little water but the water quality was still fine and the scenic surroundings are really beautiful. There were lots of fun possible jumps and we only rarely unpacked the ropes. Canyoning Technically not a difficult canyon but highly recommended for anyone who likes to jump. Because it is also commercially run, all the stands are great and there are lots of fixed ropes in the canyon. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Riu Pitrisconi Très petit filet d'eau, parfois l'eau disparait mais réapparait toujours. Si on n'avait pas croisé un guide au départ qui nous a dit que c'est en condition on n'y serai pas allé. A noter une navette 4*4 possible (je n'ai pas le tarif), qui part de l'arrivée du canyon - ils font leur business en déposant les touristes au départ du canyon (soit ils randonnent, soit ils se baignent dans les vasques) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22366/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Riu Pitrisconi La sortie numéro 1 est facilement réparable. Pas trouvé la sortie 2. Après la sortie 1 nous avons descendu deux rappels équipés, un en amont et un en aval d'un affluent rive gauche ... pas de cairn et pas de sentier en RD jusqu'au sommet d'une 3ème très belle cascade équipée. Du coup remontée sur corde de la seconde et à pied de la première. Sur OpenTopoMap on voit un sentier en RD significativement plus loin que le pied du 3ème obstacle qui donne sur une fin de piste, qui donne elle-même accès à un sentier qui rejoint le sentier "officiel " de RD... !!!Tres beau canyon.
