Specialities:
suitable in rainy weather,

Gear:
Ropes: 2x 30m

Summary: (machine translated)
Low water rappel canyon with a few jumps.

Hydrology: (machine translated)
Canyon, which is very often accessible, even if other canyons do not open again after rainfall.
Unfortunately, the water level picture is only possible at the top at the entry.

Access: (machine translated)
From Locarno in the direction of Centovalli to Intragna (8 km), park your car in the parking lot of the cable car (to Costa) (parking fee).
Alternatively, you can also reach the summit by transferring vehicles (see Brunner, B. op. cit.).

Approach: (machine translated)
Parking lot at the train station: Access is possible directly from Intragna via the hiking trail to Pila (45 min.).
Alternative shuttle: From the parking lot, follow the hiking trail uphill from the hairpin bend and enter the stream at the bridge over the stream.

The cable car has not been running since 2023; you could have taken it to the Pila middle station.

Tour: (machine translated)
Sequence of medium-high rappels; some jumps are also possible. There are always opportunities to get off.

In the lower third, near the houses, there is a section that is usually very slippery and sometimes disgusting, where there is always dirt to be found. However, the three final abseils towards Melezza are good again.

C18

Return: (machine translated)
Either exit before the last (18m) rappel into the Melezza on the left or rappel down to the Melezza and climb up again directly on the left bank, following the path to the village. Approx. 30 min.

Alternatively, get off further up at a steel door "Privado"
(open lattice door with steel cables), follow a small mini-climb onto the road that leads to the village and back to the station.

Coordinates:
Canyon Start 46.1782 8.6910
Canyon End 46.1746 8.6974
Parking at Entry 46.1760 8.6920
Parking Entry and Exit 46.1780 8.7019

Good canyon after a day with a lot of rain, we made a few jumps and abseils. The anchor halfway down the high abseil near the bottom has a damaged anchor in the middle. One glue-in bolt has come loose. The other one is loose as well.We also did the last abseil. Stay directly to the left when looking for the path back. Once you find the path, it’s super clear.

Everything in order. A bit slippery, but quite a few jumps for a stream with such a small catchment area. (machine translated)
