Country: España / Spain **Region:** Aragón **Subregion:** Huesca **Town:** Tella-Sin		
Difficulty: difficult	**Grading:** v5 a2 IV	**Total time:** 7h20
Approachtime: 2h	**Tourtime:** 5h	**Returntime:** 20min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 900m	**Highest rapell:** 51m	**Amount rapells:** 17
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - August	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Hard canyon, difficult for its long access and long development. We will have to do it in spring to be able to find it with flow and to be able to enjoy it, in that case surely the Cinca goes strong. We will have to foresee spare material since few people do it and the anchorages can be in very bad condition.
Obligatory combination of cars.

Hydrology: (machine translated)
Difficult because of the closed environment, but possible

Access: (machine translated)
We are located in Ainsa (N260), we will take the A138 towards France through the Bielsa tunnel. After a few kilometers we will pass through Labuerda and at pk57 we arrive at Escalona. We will continue towards France passing through Lafortunada until the detour to the Chistau/Gistaín valley (A2609).
After Salinas and the detour to Gistaín, the road crosses the river and soon there is a track on the right, we will enter and park the car where we can best return.
With the access car we return to the detour to Gistaín, we get into this road and after passing Saravillo, before the tunnels, we have the detour to Sin on the left. We will take this road and go up to the village, just before arriving we have the detour to the left to Serveto, which surrounds the village of Sin, in the first right fork there is a track in front, we will take it and go up to the hill of Sebillún and the Eta de San Miguel.

Approach: (machine translated)
We will leave crossing the plain/plain of Sebillún in a northerly direction looking for the losing path that climbs to the Pegueras peak. At about 1900m altitude, just at the foot of the peak, the forest ends and we can turn left, west to go around the peak to a small hill where we enter the watercourse of our ravine. We will follow the riverbed until it begins to box in.

Tour: (machine translated)
Alpine descent, very long, with great views and "fair" facilities.

Return: (machine translated)
When the ravine is approaching the Cinca loses height and opens up, we will continue to the Cinca river. If we can cross it we go up to the road and go to the parking lot, otherwise we will have to go up the Cinca with care.

Coordinates:
Canyon Start 42.5737 0.2666
