The rappel of the upper part, from the most exposed double (now triple) anchor, is a perfect pitch with light rubbing and with a 60 you get right to the base. Lower part more horizontal, more aquatic and playful. We doubled or replaced 10 guns (put all 10's except one 8). There were pretty much only Cacace singles from 15 years ago, a couple of which were bent/broken. Approach of 1h40. Photo 1: upper part Photo 2: very deep puddle in the upper part Photo 3: rappel higher than the upper part Photo 4: corridor in the lower part (machine translated)
