Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Jump of more than 50m that we will be able to do out of the active or inside the waterfall taking advantage of the fractionation. Immediate access by securing from the railing of the bridge and quick return. Better after rains so that it is not only the water from the treatment plant.

Hydrology: (machine translated)
Not in the cascade

Access: (machine translated)
We will have to be located in the town of Chella.
On the CV580, at the exit heading north to Bolbaite, take the detour to the right to the Salto and the sports center. We will arrive at the bridge and pass it almost to the EDAR (wastewater treatment plant) and park.

Approach: (machine translated)
Immediate access from the bridge

Tour: (machine translated)
A first secured landing from the bridge or by a path to the left of the waterfall. The first facility is just at the beginning of the jump to the left and we can make the full descent down almost without getting wet. If we want to get into the asset there is a facility 20m to the right.

Return: (machine translated)
We will exit to the left to a path that goes up to the WWTP.

Coordinates:
Canyon Start 39.0472 -0.6608
