Summary: (machine translated)
Rappel canyon down to Chalamy

Hydrology:

Access: (machine translated)
as at Chalamy to Ponte di Gorf (see access routes and implementation route in photo gallery at Chalamy)\n\nA shuttle Ponte di Gorf (P1) to Gettaz (P3) is possible, provided that the road is not closed to through traffic.

Approach: (machine translated)
From the Ponte di Gorf (south side) we take the trail "4a" that leads us up to the hamlet of Gettaz in about 45 min. \From here (P3) we take the forest road (also still "4a"), which runs in a westerly direction towards the Setze. After about 100m, a path branches off to the right (cairn). We cross a meadow, enter the forest again, where the path is more pronounced, and reach the stream in a steep descent. \If you want to "take" the 3 rappel above it, climb up on the western side of the stream for about 10 minutes along the bank.

Tour: (machine translated)
A total of about 12 rappel down to the mouth of the Chalamy.

Return: (machine translated)
In this or on its bank further down, you will come across a track on the right bank, which we follow until the water drainage. Here you could exit left to the road on the left slope of the Chalamy (P4). As a rule, however, one continues and completes the ascent of the Chalamy (see description there) or ends the tour at the Pont de Gorf (P1).

Automatisch importiert von Descente-Canyon.com für Canyon Gettaz Accès : depuis la piste il faut prendre la 1ere sente rencontrée à droite après avoir dépassé la fontaine, bien rester à flanc, la sente se perd par endroit puis on se laisse guider par le bruit de la cascade. équipement correct toujours sur 2 points, quelques relais vieillissant cependant. Jonction entre les 2 canyons par la marche en blocs Le rappel de corde du 1er relais de chalamy rg est difficile du fait de l'emplacement du relais.
