Specialities:

Gear:

Summary: (machine translated)
Interesting canyon to perform in spring with good flow, yes, we must carry spare material, cords, ... In summer there is only a trickle of water.

Hydrology: (machine translated)
Complicated by the abundant vegetation of the surroundings

Access: (machine translated)
From Olot to Castellfollit on the A26.
Once in Castellfollit take the GIV-5221 towards Oix. We will travel 1,7kms along this road until the detour to the left to the Vall del Bac.
Along this road we will go 5,5kms until the bridge over the torrent, almost next to Can Planes. We park

Approach: (machine translated)
Shortly before the bridge there is a path, this path goes directly up to Toralles, all the time with great views of these small valleys. Arriving at the village take the track below the church, there is a path that leaves it to the river, just a water house and a dam

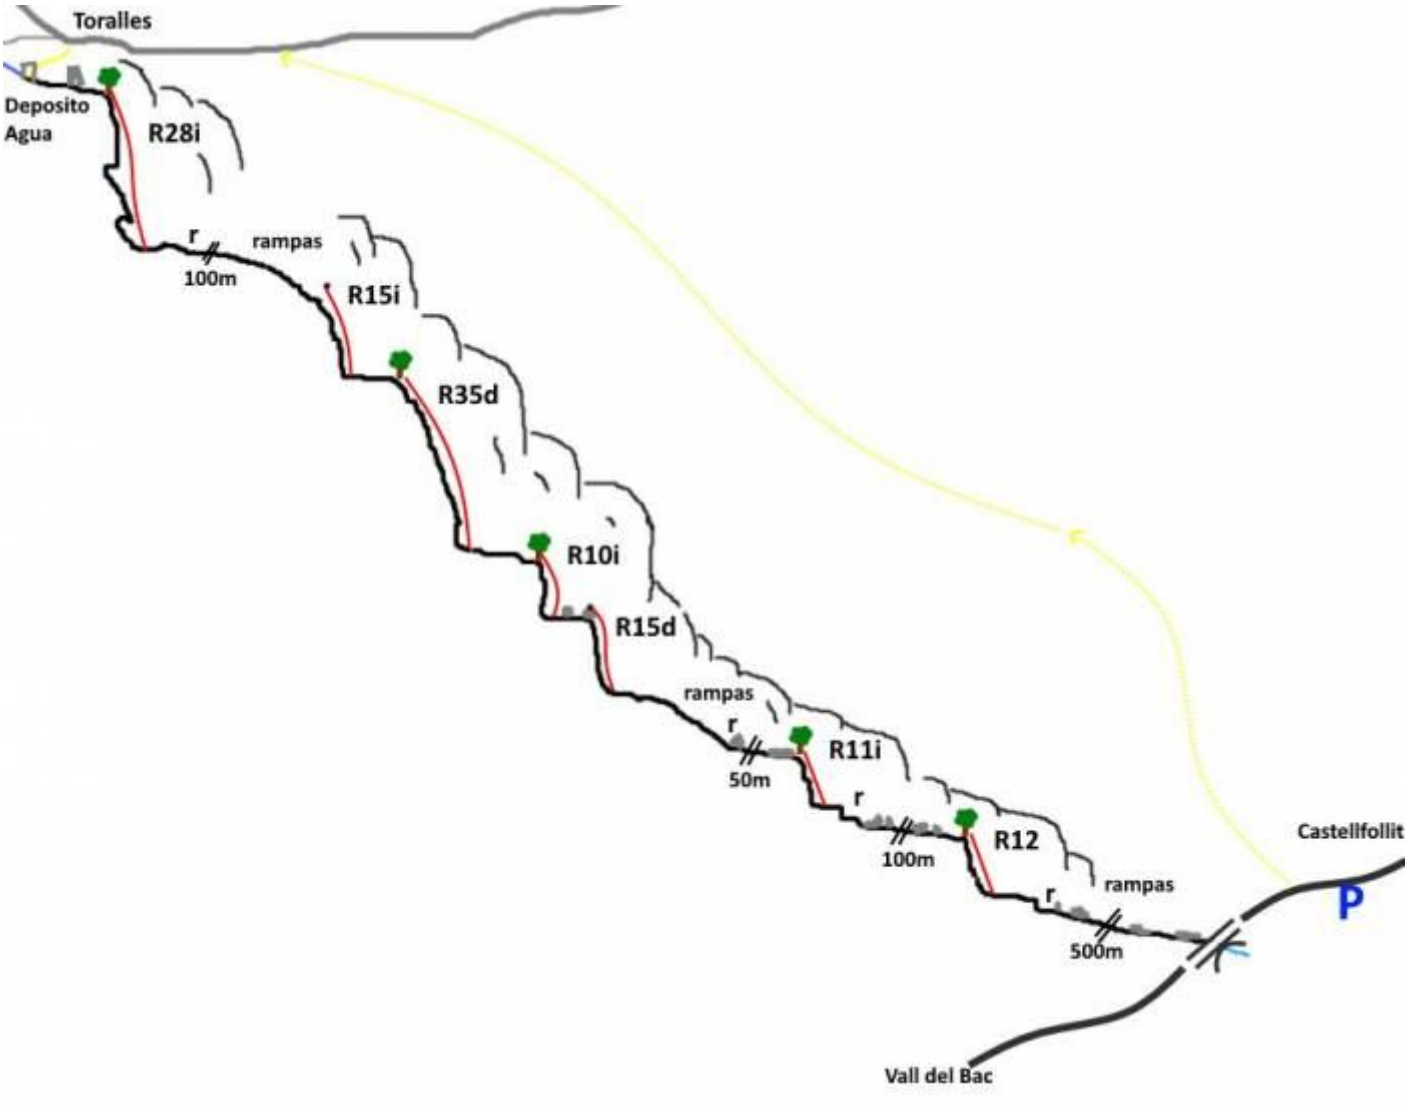

Tour: (machine translated)
We start with a first long rappel with some very interesting formations, we will continue through a simple area with some ramps, to reach the rappel area. 4 almost consecutive rappels with the longest of 35m. Then the ravine loses some entity.

Return: (machine translated)
Just before reaching the road bridge, we will exit to the left.
