Raw data import from Descente Canyons https://www.descente-canyon.com/canyoning/canyon/22788

Hydrology: (machine translated)
Not too large a catchment area, but with a glacier, so only possible from late summer.

Access: (machine translated)
Parking at the Gigerwald reservoir.

Approach: (machine translated)
On foot First follow the road until you reach the junction. Then turn left up the hiking trail to Panäraalp. You can start at 1730m, 1820m or 1860m.

Tour: (machine translated)
Not the best rock at the beginning, but very continuous. The middle section is the best. The exit is a 60m climb through the "window", but there is a high risk of falling rocks.

Return: (machine translated)
Depending on the water level of the lake, it is not so easy to get back onto the road.
