Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 1.8 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Nice canyon almost of initiation. Except for heavy rains it does not usually present problems.
Perfect to combine with the Forat Negre or the Empalomar ferratas.
It is of payment 3€ Federated and 5€ Not Federated

Hydrology:
Sí

Access: (machine translated)
We will be located in Vallcebre. To do this we will take the C16 from Berga to Puigcerdà.
Access Forat Negre and Baga
After Berga, about 15 km. and just after leaving a tunnel, take the detour to the left towards Saldes. We will go up the road until another detour to our left towards Vallcebre, once in the village we will cross it and go up the asphalted track until a detour to the left that will leave us next to a bridge and a kind of warehouse, here we will leave the first car.
With the second car (if you have it, if not on foot), continue along the road-track up until you reach a parking lot on the left side of the road from where you can also access the Forat Negre and the Ferratas de Empalomar.

Approach: (machine translated)
Approach Forat Negre and Baga
We will only have to follow the course of the river up to the ravine, the one on the left is Baga and the one on the right is Forat Negre.

Tour: (machine translated)
Canyon without too many complications except for a 25m rappel, all of them are very steep.

Return: (machine translated)
When we see a hut on the left we exit to the right towards the Forat Negre escape path. We can also continue to the confluence with Forat and exit further down.
IMPORTANT not to exit to the left under the hut, private property.

Coordinates:
Canyon Start 42.2014 1.8125
