Country: Österreich / Austria Region: Tirol Subregion: Bezirk Reutte Town: Stockach		
Difficulty: difficult	Grading: v3 a5 III	Total time: 4h30
Approachtime: 1h	Tourtime: 3h15	Returntime: 15min
Altitude entry: 1280m	Altitude exit: 1100m	Delta Altitude: 180m
Canyon length: 1700m	Highest rapell: 25m	Amount rapells: 16
Transport: on Foot	Rock type:	Drainage area: km²
Season:	Orientation: North	Best Time:
Rating: ★ 3.2 (3)	Info: ★ 2 (1)	Belay: ★ 3 (1)
Specialities:		
Gear: Ropes: 2x40m		
Summary: (machine translated) Very beautiful, aquatic and technically demanding canyon; well equipped; three emergency exits in the lower part; several pools with strong currents and undercutting; also with small returning pools is to be expected; large catchment area (15Km2); no beginner tour! Possibly some steps slidable / jumpable; access through stone tunnel with beautiful views.		
Hydrology:		
Access: (machine translated) Drive south from Reutte to the village of Stockach. Before the bridge (petrol station) there is a large gravel parking place on the right and left side of the road where you can also stay overnight (parking 1 day €3,-, overnight stay €10,-, as of 2022). You can either park your car here or turn left towards Sulzlbach, cross the bridge briefly and continue left to the last house (old youth hostel) next to the Sulzlbach. There is space for about 10 cars here.		
Approach: (machine translated) Directly at the old youth hostel, you can descend into the stream before the tour and then check the water level 10 minutes upstream at the last high 25m + 8m cascade. After the check, the best way up is via the forest road right next to the youth hostel (signposted "Stierboden, Sulzlbachalm"). After the panoramic tunnel holes, continue to the wooden cross. Here, immediately turn left onto a cow path and descend to the stream (small wooden bridge) at approx. 1280m.		
Tour: (machine translated) The tour starts just below the Sulzlbachalm, which is open in summer, at the small wooden bridge. After a walking and climbing section (approx. 200m) comes the first of many abseiling sections up to a maximum height of 10m, which are usually mastered without any major problems. Between the abseils in the upper half, there are always short walking and downclimbs. The further you descend, the more the canyon narrows and the difficulty increases. The abseils are all well placed. However, caution and clean rope work are required in the sometimes very aquatic and current-rich pools! Two striking 25m abseils with large pools (1x in the middle and 1x at the end) are the key points of the tour. If you don't have a good feeling at the last high cascade (25m+ 8m), you can descend orographically left to the flat streambed (at approx. 1200m) via a fixed rope and old maintenance climb.		
Return: (machine translated) After the last cascade, follow the flat streambed for about 1100m back to the youth hostel (parking lot).		
Coordinates: Canyon Start 47.2404 10.3666 Canyon End 47.2519 10.3661		

Reports:

2023-07-15 | Patrik | ★ ★ ★ | 📖 ★ ★ | ⚓ ★ ★ ★ | 🌊 High | 🍏 Completed

All bolts/chains are present according to the topo "Tiroler Schluchtenführer". At abseil No. 7, a Rappel Guide or Circuit Ferme is advantageous or necessary at a high water level (bolts are present at the bottom-left), strong backflow and rocks are washed out. At rappel no. 3 there is also a strong backflow. The pool is relatively large (not visible from above) - use steel rope as rappel guide or jump in front of the white water. Have fun.... (machine translated)
