Summary: (machine translated)
Adventure canyon, little known, with a very alpine atmosphere, good verticals, scarce facilities,... for people with experience and strength, because it will be a long day with 25 rappels and a multitude of skills.
They are really two canyons, a first part Cuirola and when receiving the left contribution Ricossanto if we attend to the ICGC.

Hydrology: (machine translated)
On the slopes, although not always possible

Access: (machine translated)
On the N260 between Pont de Suert and La Pobla de Segur, at the height of Senterada we turn off on the L503 to the Torre de Cabdella. We will continue along the same road to the village of Cabdella, we cross it, cross the Flamisell and continue along the road about 2kms until some hairpins, in the second left, very closed with a high guardrail, just where the guardrail ends, we have room to park the car back. Here we see the end of the ravine. With the access car we continue to the dam and cross it to park in the parking lot on the other side.

Approach: (machine translated)
Banks Ricossanto, Valldomars and Pigolo
We will leave in the direction of Estany Gento, quite steep path on the orographic left of the Canal de Pigolo, great views of the Vall Fosca, the cirque and the reservoir until we reach the greenway, old wagon track, here we will go to the right, cross two small tunnels and continue. Along this road / path are about 2.5 km until you reach the water catchment where our descent begins.

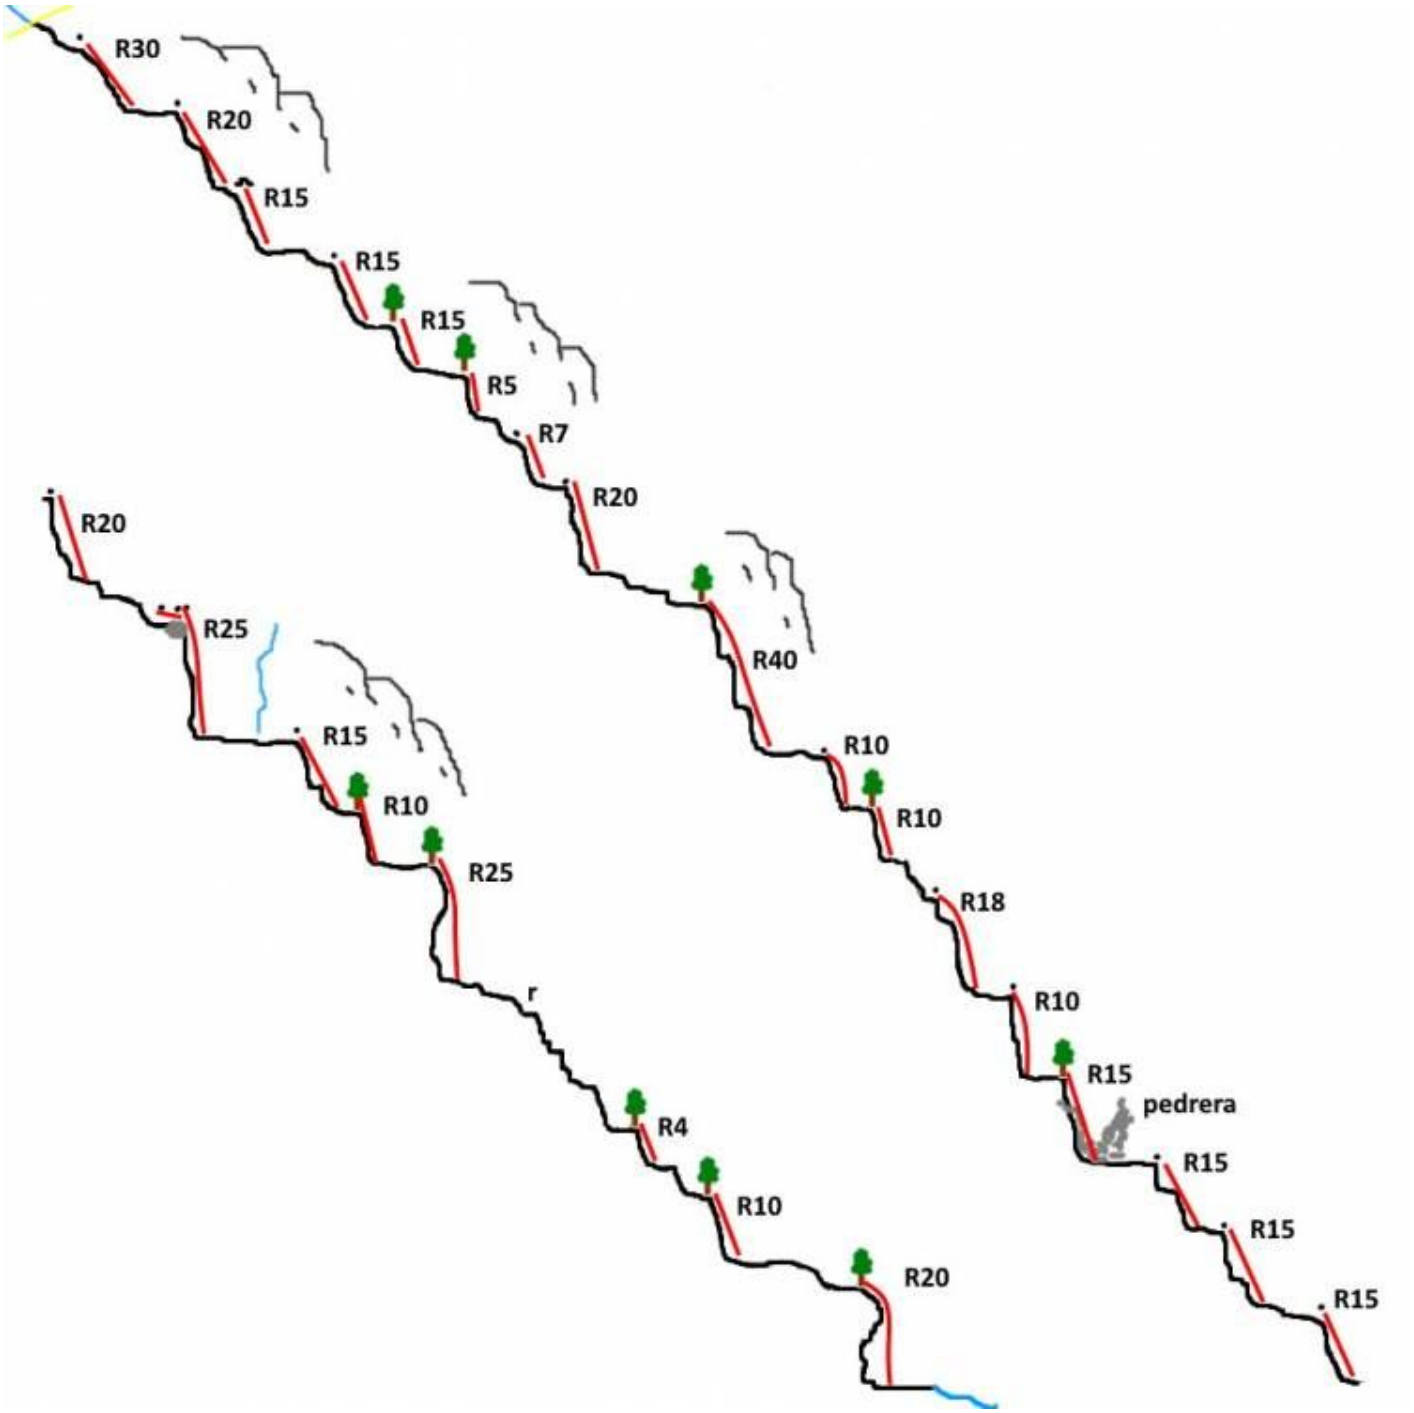

Tour: (machine translated)
See review

Return: (machine translated)
After the last rappel we will see the curve of the road, we will only have to go towards it.
