Resumen: (traducción alternativa) rappel canyon		
Hidrología: (traducción alternativa) https://vowis.vorarlberg.at/stationsInfo/tbl_Abflusstationen.aspx		
Acceso: (traducción alternativa) First to the upper parking lot for the access to the Kobelache (see there); then further up the forest road along the Kobelache. We cross its streambed 3 times. Immediately before the 4th bridge (approx. 1.5 km from the Kobelache parking lot) we take the track branching off to the left (eastward). Again we cross streams 2 times (the 2nd time in a sharp left turn). From our forest road, which now leads uphill in a northerly direction, we can see the Kobelalpe, which is located on the left below, and shortly afterwards we reach a small plateau in a right-hand bend. Here we can park the car.		
Acceso: (traducción alternativa) From the aforementioned right turn, we follow the forest road for about 40m in an easterly direction before we descend pathlessly to the left (northwards) into the streambed of the Rudach.		
Recorrido: (traducción alternativa) After a few meters in the streambed, a few smaller steps follow (at the first step, which can also be downclimbed, anchors are somewhat hidden in a downstream arch) before we reach a higher drop (approx. 40m). We rappel down this in two parts. This is followed by a rappel of approx. 20m; if you rappel over the trapped root stump, you can stay out of the stream for the most part. After another rappel (approx. 14m), we take the handrail to the belay above the C65. There has already been an intermediate belay in this wall, which is now below us, but you should not rely on it, as the rappel (in fall line) lies in the catchment area of the ray (albeit on its edge) when the spring floods thunder down.		
Regreso: (traducción alternativa) After the final high waterfall in a wide arc pathless uphill in a westerly direction. A few meters below the ridge we reach a hiking trail that leads us along the edge of the large meadow, past the Kobelalpe, up to the parked car.
