| Resumen: (traducción alternativa) Alpine forest canyon with a sequence of higher rappels without longer runs | | |
| Hidrología: | | |
| Acceso: (traducción alternativa) From Annecy on the D909 (possibly also on the D16) to Thônes. Continue on the D16, first in a southerly, later in an easterly direction into the valley of the Fier to Manigod. Here we leave the D 16 and head towards Tournance, La Charmette. 560m after Tournance we park our car before the bridge with the signs "La Gutary" on the left of the road. | | |
| Acceso: (traducción alternativa) Back along the road for about 50m, then down the meadow path and over the Fier. Continue along the path on the other side until a sign on the left uphill points the way to the Cascade de Nant Burgeat. You can see the water flow at the final waterfall. From here, follow the path back for about 50m and then - steeply in places - up to the left. At the top, we come to a meadow with a view of the mountains to the east and south-east. Now we cross the - partly swampy - meadow to its south-eastern corner and easily reach the streambed here. If we are looking for a direct entry to the beginning of the vertical area, we go directly downhill in an easterly direction on the left edge of the forest after reaching the meadow, enter the forest and come across a fixed rope directly above the streambed, which makes it easier for us to enter the streambed. This direct access avoids the two slides at the beginning of the usual descent. | | |
| Recorrido: (traducción alternativa) First a few meters in the wide streambed, then the two small slides. This is followed by the vertical part to the viewpoint below the waterfalls. | | |
| Regreso: (traducción alternativa) On the path down to the fier and up to the parking lot. | | |

Automatisch importiert von Descente-Canyon.com für Canyon Nant Bargat un debit agréable pour ce canyon. on a moins galérer que la première fois ou je suis venu pour trouver la marche d'approche. pour l'equipement tout es ok. attention il y a un peu de gestion des frottements a mettre en place sur certains rappels evidents (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21345/observations.html>)
