Resumen: (traducción alternativa) Varied canyon with only 2 rappels, but impressive ambience.		
Hidrología: (traducción alternativa) Water level: http://www.saihebro.com/saihebro/index.php?url=/datos/ficha/estacion:A051		
Acceso: (traducción alternativa) We drive north on the A-138 from Ainsa in the direction of Bielsa. After 10 km (from the center of Ainsa) we cross the Rio Bellós and then pass through the village of Escalona. 350m after the bridge we turn northwest at the traffic circle ("Fanlo" - "Anisclocanyon") onto HU-631. We first drive along the river (Rio Bellós), then 1.9 km after the mentioned traffic circle in the north of Escalona we turn left onto the road to Buerba and Vio. We first pass the campsite and then go up to Buerba for 12 km. We turn left into the village and park our car in the large square.		
Acceso: (traducción alternativa) We walk along the road through the village in a southerly direction. After the last houses, on the righthand side, there are some barns - now also converted to residential use - with mostly circular threshing floors in front of them. There you turn left if you want to "include" the Manatuero in the access. Otherwise, continue straight downhill and reach the valley of the Rio Yesa. Where the path branches, we go right. The path leads through bushes high above the Rio Yesa. It gives us our first glimpses of the descent. Eventually we come to a fork where there is a somewhat uncomfortable access down to the streambed on the left. It is also possible to continue until the bridge that leads to the houses of Yeba.		
Recorrido: (traducción alternativa) After a short approach in the off. Streambed we come to the with 12 m "highest" rappel. Then we stand at the bottom of the gorge, In the further varied course is particularly impressive a passage where the streambed between parallel walls is so sintered that it looks like a road. After the canyon opens, continue a few hundred meters to the place where the waters of the Manatuero flow in from the left.		
Regreso: (traducción alternativa) Here out on our approach path and back up to Buerba.		
Coordenadas: Inicio del Cañón 42.5314 0.0212 Final del Cañón 42.5266 0.0404

Automatisch importiert von Descente-Canyon.com für Canyon Yesa [superior] Canyon aquatique magnifique et sauvage, on a sauté le rappel du départ. Pour le retour, on a pris une sente très raide et épineuse RG dès le retour des arbres (sentier d'approche à 40m au dessus), mais mieux vaut continuer pour trouver un bon sentier.Remontée longue et chaude.A faire avec la traversée de la grotte de Manatuero pour une superbe journée bien remplie. Automatisch importiert von Descente-Canyon.com für Canyon Yesa [superior] Première fois pour moi ce canyon, parcouru à 8 pour les 20 ans du club déclic aventure.On a posé une corde sur le 10 m pour les plus frileux au niveau sauts, mais c'est tout, tout se saute. Vraiment très beau. Les toboggans ne glissent jamais. Sympa pour faire une belle rando aquatique si vous sautez tout.
