Resumen: (traducción alternativa) Narrow rappel gorge, lower part of a total tour with a 35m rappel and longer unpleasant walking passages in or next to the stream.		
Hidrología:		
Acceso: (traducción alternativa) On the N 532 parallel to the highway from Grenoble in the direction of Romans-sur-Isere. Pass through the towns of Cognin les Gorges, then Iseron and about 2 km after Iseron turn left towards St. Pierre de Cherennes. Continue on the D 31 through St. Pierre de Cherennes in the direction of Le Faz. About 1.5 km after the end of St. Pierre de Cherennes, before a leftward hairpin bend (on the right is a small sign La Combe before the entrance to the private property), you will find a bulge on the left near a rotten well. Park the car there.		
Acceso: (traducción alternativa) Unfortunately, there is no other way than to walk (or drive with a second car) about 1.5 km further uphill to the next left turn (sign: Nacon). Shortly before the left turn, go right (after opening a gate) down a slope, at the exit of which is dumped construction debris about 80 m further on. Continue pathlessly above the hut along the fence until you reach a path leading down from the houses above (climb over the pasture fence). Follow this path to the right, first downhill, then in a slight left bend in the direction of the south until you reach a meadow; cross this meadow and descend to the brook. Now downstream to the right until you reach the rock wall. There, climb over the pasture fence and into the streambed (approx. 15 min.).		
Recorrido: (traducción alternativa) Despite the pathless access over the steep and by cows massively zugesch.... meadows and the shortness of the tour (only 150 m long) an absolute treat. Beautiful tuff cascades, narrowly cut, smoothly washed out and meandering. There is also an upper part, see references (Internet and book).		
Regreso: (traducción alternativa) After the opening of the canyon, at a decaying bridge, up to the right, first over a meadow path and then on the gravel road in front of the houses of La Combe past (privé) to the hairpin bend where the car is (15 min.).

Automatisch importiert von Descente-Canyon.com für Canyon Carmes Première partie sans grand intérêt en dehors de la C35, trop de marche et d'embacles. La seconde partie est belle mais courte . Faire simplement la deuxième partie pour compléter une belle journée de canyon dans le coin (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2596/observations.html>)

3 times during guide training course. The connection between the bolts on the last abseil is gone. (River left) It can use some new webbing. We did a lot of pruning on the way in and out!

Automatisch importiert von Descente-Canyon.com für Canyon Carmes Version express uniquement. Superbe petite partie.Marche d'approche comme décrite par l'équipe précédente. C'est très galère comme ça. Il y a une bonne sente qui descend pour rejoindre le sentier. Elle doit probablement partir de l'endroit où la route fait un angle droit, avant la 2eme épingle à gauche. A tester. Water level back to normal after the rain. The narrow section is nice and beautiful. Perfect for a training trip with beginners
