<b>Especialidades:</b>		
<b>Equipo:</b>		
<b>Resumen:</b> (traducción alternativa) Short tour in the rearmost Val Settimana. Can be combined well with Ciol de Pes or the Rio Stuet		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) From Claut into the Val Settimana, follow the road to the Ponte del Chiarer bridge and then continue for about 1km to a parking lot under the Ciol de Pes waterfall.		
<b>Acceso:</b> (traducción alternativa) Cross the Torrente Settimana and follow the marked hiking trail 375 uphill on the other side. After several steep hairpin bends, the path leads briefly downhill, branch off here from the marked path onto an indistinct trail and follow this for about 300m. Just before the path turns into a steep meadow, descend steeply to the streambed on the right.		
<b>Recorrido:</b> (traducción alternativa) Downclimb briefly in the boulder bed before reaching the first rappel on the left. 13 rappels up to max. 22m. Several small slides and possible jumps in a low gorge. The rock was extremely slippery during our ascent.		
<b>Regreso:</b>		
<b>Coordenadas:</b> Inicio del Cañón <a href="#">46.3332 12.5836</a> Aparcamiento Entrada y Salida <a href="#">46.3409 12.5797</a> Final del Cañón <a href="#">46.3405 12.5803</a>		

## Informes:

2025-10-12 | MirkoT | |📖| |🚢| |★| |🌊| Alto | |👍| Completado

On the first rappel, do not detach from the rope after the two puddles, as the third puddle would be a very precise dive, but with a very slippery start. If you do, you can ascend for a few meters up the right bank on grassy slope and then return to the bed. Severely slippery for the entire run. The safest sections are those on moss. From the third rappel no possibility of overflow in case of problems. Only after the penultimate rappel on the right bank is there a chance to exit by going up the slope. The last rappel is a ten-minute winding walk from the penultimate one. From the last rappel to the cars there is a chaos of boulders where, as an alternative, there might be 2-3 interesting rappels present, but I did not notice any weapons present to get down into the water. Flow rate about 60/70 liters. (traducción alternativa)

Need some bolt replace. Just sufficiently to go..

2023-06-10 | Horst Lambauer | |★|★|★| |📖| |★|★|★| |🚢| |★|★|★| |🌊| Normal | |👍| Completado

All stands ok, on the last rappel before the block chaos we took a tree because we have not found a stand. Quite nice tour with a small narrow gorge between them. Very well combinable with Stuet, CirosoLin, Col del Pes (traducción alternativa)
