<b>Resumen:</b> (traducción alternativa) Forest canyon that becomes more interesting towards the exit. The first part is narrow and incised - the second part is more open and vertical.		
<b>Hidrología:</b> (traducción alternativa) An emergency exit at about the halfway point.		
<b>Acceso:</b> (traducción alternativa) We leave the E62/SS33 at the Villadossola exit and drive along Via Sempione via Beura-Cardezza and Quarata to Cosa. We park the car in front of the church of Guiseppe Artigiano. It is located at the foot of the hill, not far from the exit from the Robana.		
<b>Acceso:</b> (traducción alternativa) From the parking lot, walk south along the foot of the slope until you reach the path to the San Lorenzo chapel. Turn left up here. Once you reach the chapel, take the path to the left across a meadow just a few meters further on. It leads us directly to the entry (see map in the photo album and gallery).		
<b>Recorrido:</b> (traducción alternativa) At the beginning several small rappels, connected with running sections. At the exit, the "highlight" with the 50m drop.		
<b>Regreso:</b> (traducción alternativa) After the last rappel, descend a few more meters in the stream, then take the stone steps with railings to the left and through the forest in a few minutes to the church and the car.

<b>Informes:</b>		
2025-09-12   Joey CIA   ★★   📖   🗣️ ★★   🌊 Bajo   🍏 Completado Shortly done in the afternoon, good start tour after 6 hours drive to prepare for the next days. Most of the anchors were ok, on the penultimate rappel before the 50-pitch anchor on the intermediate belay completely loose. The highlight is the final waterfall. (traducción alternativa)		
2023-07-24   Patrik   ★★   📖 ★★   🗣️ ★★   🌊 Bajo   🍏 Completado Good alternative when all other gorges have too much water. It smells a bit like stale water. Installations are good. (traducción alternativa)
