<b>Especialidades:</b>		
<b>Equipo:</b> Cuerdas: 2x60m		
<b>Resumen:</b> (traducción alternativa) Like many other canyons in Mallorca towards the summer hardly more water flow. Beautiful, zT. also high rappel, mostly sintered.		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) Exit the Palma ring road at exit 58 onto the Ma1110 and head north. After 6.8 km, at the traffic circle by the scattered houses of S'Esgleieta (a restaurant on the righthand side), continue north on the Ma 1110. After another 7.9 km we reach the center of Valldemossa. We continue - now on the Ma1130 - in the direction of Andratx. After about 900m we leave the road junction to Soller on the right and about 400m further we come to the junction (right, NNW) in the direction of Port/Marina de Valldemossa. We turn here on the Ma1131 and go down to Port de Valldemossa (another 5,4km). Here we look for a suitable parking lot near the beginning of the village. With the second car we drove back again 4.3 km and up to the plateau. It is best to leave the car here already in front of the houses of the hamlet Son Mas.		
<b>Acceso:</b> (traducción alternativa) Orograf. left of the bridge a few meters downstream we come into the streambed. In the book "L'illa dels torrents" by Barceló/Trias is described an access from the orographic right side of the stream directly from the car parked in front of the hamlet. Also the alternative access via the Torrent Rafal leads inevitably over private land.		
<b>Recorrido:</b> (traducción alternativa) We climb or ropes down the streambed. After about 200m, the water of Torrent Rafal splashes down from the top left. A jump is possible here if the pool is full. This is also the case several times in the following sections. In addition to a few 20 to 35 meter rappels, we also come across the "Gan Salta" with 55 meters (about 15 rappels in total). Once at the bottom, we walk and climb further down the streambed.		
<b>Regreso:</b> (traducción alternativa) In front of a large rock in the streambed, turn right out to the road and downhill to the car.

Despite the supposedly best time of year, completely dry except for a few stale pools. The "inflow" from the left was a sweet trickle, so still dry as dust, the pools also completely empty, so be careful not to rappel too far into the empty pools. Only one would cause problems for getting out, but there is a fixed rope mounted there as an ascent aid. However, many of the abseiling sections can be climbed down, and the rock is generally quite grippy. We sweated ourselves to death in our wetsuits, but would have been fine in a T-shirt and trousers :) Sinter formations are beautiful but not very rewarding without water. Cell phone reception is also possible in the meantime, as the canyon is very open (traducción alternativa)
